Albert Einstein The Human Side New Glimpses From His Archives:

Albert Einstein, the Human Side Albert Einstein, 1979 One of the 20th century's most profound thinkers not only transformed the direction of scientific endeavor but also influenced other fields such as psychology, linguistics, and ethics. This volume comprises 23 papers delivered at a 1979 symposium and includes examinations of Einstein's impact on scholarship, culture, and more. **Albert Einstein, the Human Side** Banesh Hoffmann, 1981 *Albert Einstein, the Human Side* Helen Dukas, Banesh Hoffmann, 1979

Albert Einstein, Historical and Cultural Perspectives Gerald Holton, 1982-06 Essays discuss the Special Theory of Relativity, the Unified Field Theory, quantum physics, and Einstein's impact on culture.

Complexity Melanie Mitchell, 2009-04-01 What enables individually simple insects like ants to act with such precision and purpose as a group? How do trillions of neurons produce something as extraordinarily complex as consciousness? In this remarkably clear and companionable book, leading complex systems scientist Melanie Mitchell provides an intimate tour of the sciences of complexity, a broad set of efforts that seek to explain how large-scale complex, organized, and adaptive behavior can emerge from simple interactions among myriad individuals. Based on her work at the Santa Fe Institute and drawing on its interdisciplinary strategies, Mitchell brings clarity to the workings of complexity across a broad range of biological, technological, and social phenomena, seeking out the general principles or laws that apply to all of them. Richly illustrated, *Complexity: A Guided Tour*, winner of the 2010 Phi Beta Kappa Book Award in Science, offers a wide-ranging overview of the ideas underlying complex systems science, the current research at the forefront of this field, and the prospects for its contribution to solving some of the most important scientific questions of our time. *Albert Einstein, the Human Side* Albert Einstein, Helen Dukas, Banesh Hoffmann, Ze'ev Rosenkranz, 2013 Modesty, humor, compassion, and wisdom are the traits most evident in this illuminating selection of personal papers from the Albert Einstein Archives. The illustrious physicist wrote as thoughtfully to an Ohio fifth grader distressed by her discovery that scientists classify humans as animals as to a Colorado banker who asked whether Einstein believed in a personal God. Witty rhymes, an exchange with Queen Elizabeth of Belgium about fine music, and expressions of his devotion to Zionism are but some of the highlights found in this warm and enriching book. **Albert Einstein, Historical and Cultural Perspectives** Gerald Holton, Yehuda Elkana, 2014-07-14 Based on papers presented at the Jerusalem Einstein Centennial Symposium in March 1979, this volume sets forth an articulated sequence of chapters on the impact of Einstein's work not only in science but in humanistic studies and problems such as international security in the nuclear age. Originally published in 1982, The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. Building Communication Theories Fred L. Casmir, 2013-10-16 Concern with various matters related to humans as they communicate has led to an increase in both research and theorizing during the second half of the 20th century As a matter of fact so many scholars and so many disciplines have become involved in this process that it is virtually impossible to understand and appreciate all that has been accomplished so far This book focuses on one important aspect of human sense making theory building and strives to clarify the thesis that theories do not develop in some sort of social intellectual or cultural vacuum They are necessarily the products of specific times insights and mindsets Theories dealing with the process of communication or communicating are tied to socio cultural value systems and historic factors that influence individuals in ways often inadequately understood by those who use them The process orientation of this book inevitably leads to an emphasis on the perceptions of human beings Thus the focus shifts from the subject or area called communication to the act of communicating Finally this volume offers insight into how the process of human sense making has evolved in those academic fields commonly identified as communication rhetoric speech communication or speech within specific socio cultural settings

Darwin and International Relations Bradley A. Thayer, 2014-07-11 Pathbreaking and controversial *Darwin and International Relations* offers the first comprehensive analysis of international affairs of state through the lens of evolutionary theory Bradley A Thayer provides a new method for investigating and explaining human and state behavior while generating insights into the origins of human and animal warfare ethnic conflict and the influence of disease on

international relations Using ethnological and statistical studies of warfare among tribal societies Thayer argues that humans wage war for reasons predicted by evolutionary theory to gain and protect vital resources but also for the physically and emotionally stimulating effects of combat Thayer demonstrates that an evolutionary understanding of disease will become a more important part of the study of international relations as new strains of diseases emerge and advances in genetics make biological warfare a more effective weapon for states and terrorists He also explains the deep causes of ethnic conflict by illuminating how xenophobia and ethnocentrism evolved in humans He notes that these behaviors once contributed to our ancestors success in radically different environments but they remain a part of us Darwin and International Relations makes a major contribution to our understanding of human history and the future of international relations Islands of the Mind
