Chilman, 1966 Special Report to the U.S. Congress on

Alcohol and Health from the Secretary of Health and Human Services ,1981 **Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act Amendments of 1979** United States. Congress. Senate. Committee on Labor and Human Resources. Subcommittee on Alcoholism and Drug Abuse,1979 *Special Report to the U.S. Congress on Alcohol & Health* ,1981 **Alcoholism in the Professions** LeClair Bissell,Paul W. Haberman,1984 This pioneering volume describes the first longitudinal study of alcoholic men and women in the professions Based on personal interviews with 407 professionals over a five year period the book offers the first published data on alcoholic attorneys and the only follow up study on alcoholic physicians nurses dentists and social workers In addition the authors provide an international directory of support advocacy and disciplinary groups for alcoholic professionals with complete information on whom to contact and requirements for membership *The Biology of Alcoholism* Benjamin Kissin, Henri Begleiter,2013-03-09 In this volume the third of our series the emphasis has shifted from the theoretical and experimental to the more clinical and practical aspects of alcoholism Where in the earlier volumes more attention was directed to animal than human studies in this volume almost all material deals with the human condition The clinical manifestations of alcoholism may be divided into two major aspects that of the disease itself and that of its complications This separation is to some extent artificial since in a sense the natural history of the disease is a function of the development of certain complicating mechanisms These mechanisms in turn either become part and parcel of the underlying condition alcoholism or give rise to a new set of clinical variables characterized as medical complications At this point the dichotomy becomes real The disease alcoholism tends to be seen as a distinct psychosocial entity and to be treated with psychosocial techniques The medical complications are more clearly envisioned as being within the legitimate domain of medical practice and are treated by physicians who often tend to ignore the underlying alcoholism The patient is sometimes lost in between The major thrust of this volume is an attempt to describe the mechanisms of alcoholism as they are now known in such a way as to establish a continuum between the disease alcoholism and its medical complications **Current Issues in Alcohol/drug Studies** ,1989 In this new volume experts focus on a number of important issues of current interest and controversy Is alcoholism a disease or is it not Should federal bans on drugs like heroin and cocaine be removed and will that solve modify or exacerbate the problem Can the risk for alcoholism really be predicted Professionals from a very wide variety of disciplinesmedicine and biochemistry psychiatry and psychology philosophy anthropology law social work and journalismpresent their very differing points of view on the perception of alcoholism as a disease and on public policy issues like proposed legislative controls over alcoholic beverages **Thesaurus of ERIC Descriptors** ,1968 4th 7th eds contain a special chapter on The role and function of the thesaurus in education by Frederick Goodman Addiction and the Making of Professional Careers Griffith Edwards,Thomas F. Babor,2012-03-15 The misuse of drugs continues to cause suffering and worldwide economic turmoil In response to these problems many have devoted their lives to preventing the misuse of mind altering substances Addiction

and the Making of Professional Careers focuses on the need for enhanced understanding of professional careers in the addiction field. The spectrum of professionals involved is wide and includes treatment personnel of every kind. Some of the questions examined here include: Why do some people decide to dedicate their lives to responding to drug problems? How do and should we select, train, mentor, support, inspire, and nurture the young career aspirant? What makes for the most effective use of talent? Is every personal case different, or can general conclusions be reached? After a foreword by William Miller and an introduction by Griffith Edwards, the book includes interviews with Joseph Brady, Louis Harris, Conan Kornetsky, and Robert DuPont, all of whom were pioneers in the behavioral pharmacological analysis of addiction. Commentary chapters are written by Kerstin Stenius, Ilana Crome, Peter Anderson, and Jonathan Chick.
