Alliance For Change:

The Caribbean and Central America Jeromy S. Lane, 2002 Over the course of its history the United States has taken great interest in the affairs of its neighbours to the south From the Monroe Doctrine to Grenada to illegal immigration America has been and continues to be an active force in the lives of Caribbean and Central American nations In recent years the relationships have taken an economic turn as witnessed by several pacts like the Caribbean Basin Initiative and NAFTA meant to balance the US dominated relations with these closely packed countries In addition the US has had an enigmatic history with Mexico involving issues like immigration drug smuggling and human rights The public friendship between Presidents George W Bush and Vicente Fox increased optimism for smooth resolutions of US Mexican financial and political concerns However some friction has remained over American border and security worries water usage disputes and the continual problem of narcotics trafficking This book compiles a series of analyses of the varied initiatives and governmental actions linking the US to its nearest southern neighbours present status and evaluated for potential outcomes Such comprehensive studies combined in one book make for a necessary resource in attempting to assess the future course of relations among the Americas

PACTS: The Coalition for Change Bill Collins, 2011-03-29 PACTS The Coalition for Change offers a case study chronicling the efforts of one urban high school district in Northern California to change its curriculum It quantifies surveyed responses solicited from parents administrators curriculum leaders teachers and students in the district It also assesses their level of agreement on issues relating to mathematics reform These agents of change constitute the PACTS Coalition As a group they generally agree that mathematics is a tough subject and that it should be fun however their level of agreement vacillates when the investigation turns to issues such as ability level grouping the incorporation of diversity and the question of inclusion In general members of the alliance believe that the effect of reform efforts has been deleterious to the overall quality of mathematics education at their school site and in the district Many respondents cite poor communication ineffectual leadership and a lack of direction as chief deterrents to effective mathematics reform additionally most agree that cohesion unity and morale among the mathematics staff in the district have suffered as a result Author Bill Collins shows that the varying perspectives of the PACTS Coalition is key to recognizing the complexity of educational issues while revealing the vision needed for lasting education reform

Electoral Rules and Democracy in Latin America Cynthia McClintock, 2018 During Latin America's third democratic wave a majority of countries adopted a runoff rule for the election of the president effectively dampening plurality voting opening the political arena to new parties and assuring the public that the president will never have anything less than majority support In a region in which undemocratic political parties were common and have often been dominated by caudillos cautious naysayers have voiced concerns about the runoff process arguing that a proliferation of new political

parties vying for power is a sign of inferior democracy This book is the first rigorous assessment of the implications of runoff versus plurality rules throughout Latin America and demonstrates that in contrast to early scholarly skepticism about runoff it has been positive for democracy in the region Primarily through qualitative analysis for each country the author argues that indeed an important advantage of runoff is the greater openness of the political arena to new parties at the same time that measures can be taken to inhibit party proliferation In this context it is also the first volume to address whether or not a runoff rule with a reduced threshold for example 40% with a 10 point lead is a felicitous compromise between majority runoff and plurality The book considers the potential for the superiority of runoff to travel beyond Latin America in particular and rather provocatively to the United States

Hunter,2010-04-14 Christians from every tradition have long desired to change the world for the better a desire with roots in biblical and theological reasoning Unquestionably Christians today are no less well intentioned and no less motivated to do good than in times past But even taking their aspirations and intentions at face value argues James Hunter the implicit social theory that guides so much of their efforts is deeply flawed In *To Change the World* he offers three essays connected and sequential but distinct arguing that Christians should finally give up the goal of trying to change the world and the triumphalist attitude that tends to go along with that idea **Built to Change** Edward E. Lawler, III,Christopher G.

Worley,2006-02-17 In this groundbreaking book organizational effectiveness experts Edward Lawler and Christopher Worley show how organizations can be built to change so they can last and succeed in today s global economy Instead of striving to create a highly reliable Swiss watch that consistently produces the same behavior they argue organizations need to be designed in ways that stimulate and facilitate change Built to Change focuses on identifying practices and designs that organizations can adopt so that they are able to change As Lawler and Worley point out organizations that foster continuous change Are closely connected to their environments Reward experimentation Learn about new practices and technologies Commit to continuously improving performance Seek temporary competitive advantages *Partnering for Change* David B

Reynolds,2021-12-16 In the past decade unions and community groups have come together around a wide range of campaigns for economic justice from fighting for living wages to electing progressive champions to questioning market oriented economic development to promoting anti sprawl smart growth efforts Partnering for Change brings together activists and intellectuals on the forefront of these organizing efforts They discuss general patterns of labor community coalitions in terms of alliances between unions and such community players as environmentalists religious groups low income organizations and local employers The contributors also offer a wealth of case studies such as the successful campaign for

corporate subsidy accountability in Minnesota Vermont's Livable Wage Campaign The Wisconsin Regional Training Partnership and the model regional power building projects of the South Bay AFL CIO The volume's editor David Reynolds combines a broad overview of labor community coalitions practical examples applicable to diverse communities and an appreciation of the challenges as well as the opportunities for building the movement for economic change

Regime-Building Oisín Tansey, 2009-05-21 This book is a study of regime change in the context of international administration where the United Nations and other multilateral organisations hold temporary executive authority at the domestic level Work on the politics of state building has highlighted how these administration operations can influence nearly every aspect of politics in the country or territory in which they are deployed This book concentrates in particular on the regime building practices of these missions and examines the aims and influences of international administrations in the area of democratic development as well as their ultimate impact on the process of regime change Through a comparative analysis of events in Bosnia Kosovo and East Timor the book demonstrates how external actors assume positions of power conventionally held by domestic elites and in so doing gain the ability to affect democratic development in ways unavailable to international actors in more conventional settings In particular the case studies highlight the ways in which the democracy promotion objectives of international administrators can have both positive and negative effects on democratization processes with the presence of international authorities helping to rule out non democratic options in some areas while at times undermining democratic development in others The book identifies the key international actors involved highlights the mechanisms of influence available to them in these contexts and explores the crucial mediating role of domestic actors and structures Oxford Studies in Democratization is a series for scholars and students of comparative politics and related disciplines Volumes concentrate on the comparative study of the democratization process that accompanied the decline and termination of the cold war The geographical focus of the series is primarily Latin America the Caribbean Southern and Eastern Europe and relevant experiences in Africa and Asia The series editor is Laurence Whitehead Official Fellow Nuffield College University of Oxford **Unfunded Mandates--a Five-year Review and Recommendations for Change** United States. Agent For Change Gary

MacEoin, 2021-04-18 Few people deserve a biography once observed a British writer and of those even fewer get the biographer they deserve Such happily has not been true of Harvey Pablo Steele He richly deserves a biography and has found in Gary MacEoin a writer eminently equipped to understand and tell his story It is the story first of a priest who has always managed to be where trouble is First China during the Japanese invasion then a stint as an Air Force chaplain in the China Burma India theater Next to the Dominican Republic under Trujillo and presently in Panama where the church seems set on a collision course with the state Pablo Steele has had an interesting life and Gary MacEoin unfailingly catches the excitement of mine strikes in Nova Scotia in Steele's boyhood the terror of Japanese air raids and the Graham Greene atmosphere of

living under several different types of totalitarianism An interesting life yes but more significantly an important one Harvey Steele has been an agent for change a stubborn social reformer who has never let realism darken his bright vision of what could be and whose idealism insists that the future must be shaped now through study work and sacrifice Credit unions and cooperatives unlocked the doors to a more human future for the miners of his native Nova Scotia They could do the same in the Dominican Republic or Panama argued Steele and he has spent much of his life proving that argument He has also embodied in his life the massive shift in attitude and awareness which has taken place within Christianity itself the realization that the proper concern of the church is in the street as well as in the sanctuary and that slum housing and hunger are religious issues

Calling for Change Elizabeth A. Sheehy, Sheila McIntyre, 2006 Unique in both scope and perspective Calling for Change investigates the status of women within the Canadian legal profession ten years after the first national report on the subject was published by the Canadian Bar Association Elizabeth Sheehy and Sheila McIntyre bring together essays that investigate a wide range of topics from the status of women in law schools the practising bar and on the bench to women's grassroots engagement with law and with female lawyers from the frontlines Contributors not only reflect critically on the gains losses and barriers to change of the past decade but also provide blueprints for political action Academics community activists practitioners law students women litigants and law society benchers and staff explore how egalitarian change is occurring and or being impeded in their particular contexts Each of these unique voices offers lessons from their individual collective and institutional efforts to confront and counter the interrelated forms of systemic inequality that compromise women's access to education and employment equity within legal institutions and ultimately to equal justice in Canada Published in English
