located within the coastal strip between Rockhampton and Cooktown Walks vary from short boardwalk strolls in the lowland rainforests of Daintree National Park to 4-6 day hiking and camping trips on Hinchinbrook Island. Other routes follow old gold miners and forestry tracks or coaching routes or feature historical sites, rivers, lagoons, geological and geographical formations or much earlier Aboriginal communication tracks where Dreamtime stories add a further dimension. Man-made environments of abandoned gold towns, heritage riverfronts, Art Deco streetscapes and Second World War installations also feature. Most routes are best completed during the Dry season, May to October, and walked by moderately fit individuals. Most do not require specialist navigation or bushcraft skills. Walks, Tracks and Trails of Queensland's Tropics highlights the best the region has to offer. Easy-to-interpret maps are included to help you navigate and the book's size makes it convenient to carry in the backpack.

Tropical Mangrove Ecosystems A. I. Robertson, D. M. Alongi, 2013-03-18. Published by the American Geophysical Union as part of the Coastal and Estuarine Studies Volume 41. Mangrove forests are a dominant feature of tropical coasts. Like their terrestrial counterparts, these forests are under threat worldwide through a variety of destructive human practices. As is also the case with tropical terrestrial forests, management decisions about mangrove ecosystems are currently being made often without adequate fundamental knowledge of the processes controlling natural ecosystem function.
