Mensah Watts,2010-05-13 What is beyond our world That is a question I wanted the answer to so badly while growing up Little did I know that question was being answered through my forgotten and dismissed childhood experiences with the king of darkness himself As I got older the horrible haunting of my past began to come back to the front of my mind The evil spirit continued haunting me as I grew older only he did it in different ways then he did when I was a child I did not fully remember my childhood haunting until I decided to write down the stories I did remember from childhood to adulthood It was then that it all started coming back to me I then realized that the king of darkness had been haunting my life as far back as I could remember And as I began talking to people about my stories I began to realize that people were interested in my stories of the other world and its darkness of many forms After consulting with a close friend I was inspired to tell the story and to write this book [Collision of Realities](#) Lars Schmeink,Astrid Böger,2012-05-29 Even though the fantastic in its most inclusive definition has been a part of our culture for as long as it exists it has not been a prominent feature of European academic interest With its inherent transgressive moment the fantastic allows for an ideal space of the cultural negotiation of political social and physical boundaries which should place it at the center of popular cultural research not as is the case at

its periphery But the commencing boom of fantastic themes in contemporary media production has facilitated a paradigmatic change in research prompting a wide interest in the fantastic in all its forms from fantasy to horror from fairy tale to science fiction This volume addresses this growing interest by reviewing the status of research on the fantastic in Europe so far and by providing a necessary outlook for the future In the essays current trends such as the liminality debate as well as established discourses as for example on genre theory are brought together to show interested researchers a network of interdisciplinary from literary media and social studies approaches towards the fantastic

Introduction to Psychology James W. Kalat, 2005

Cosmic Secrets Wolfram Schommers, 2012 We see objects in front of us and experience a real material effect when we approach and touch them Thus we conclude that all objects are embedded in space and exist objectively However such experiences in everyday life cannot

be transferred to the atomic level within standard quantum theory the material world is still embedded in space but it no longer has an objective existence How can objects be embedded in space without existing objectively This book addresses this and similar issues in an illustrative and non conventional way Using up to date information the following basic questions are contemplated What is a particle a quantum object What can we say about the nature of time How is reality in particular the cosmos formed What is the influence of evolution on the discovery of new developments in this field Like the philosophers Whitehead and Bergson the primacy of process is advocated we experience objects OCo both quantum objects and those we experience in everyday life OCo at certain positions in space but everything is a matter of process and the existence of static objects in space is thus eliminated

An Introduction to the Phenomenology of Religion James Cox, 2010-02-10

In this thoroughly revised edition James Cox provides an easily accessible introduction to the phenomenology of religion which he contends continues as a foundational method for the academic study of religion in the twenty first century After dealing with the problematic issue of defining religion he describes the historical background to phenomenology by tracing its roots to developments in philosophy and the social sciences in the early twentieth century The phenomenological method is then outlined as a step by step process which includes a survey of the important classifications of religious behaviour The author concludes with a discussion of the place of the phenomenology of religion in the current academic climate and argues that it can be aligned with the growing scholarly interest in the cognitive science of religion

YSEC Yearbook of Socio-Economic Constitutions 2021 Steffen Hindelang, Andreas Moberg, 2022-07-12 This volume addresses contemporary challenges enabled by modern technology that concern upholding freedom of speech where it conflicts with social rights such as respect for private and family life and with economic rights such as the freedom to conduct business or the right to free movement In today's networked world technological shifts happen faster than most people even realize Some of these shifts have made us all potentially powerful media powerful We used to sit in silence in front of newspapers and TV screens and the world was explained to us by just a few sources Today thanks to the Internet social media and Web 2.0 we can not only share our own thoughts with everyone in a more self determined way but we can also take part in public debate and even co shape it ourselves Of course the Internet is not a counter design to the communication power structures of the past Gains in communicative self determination are threatened due to algorithmisation platformisation and value extraction from self created private markets At the same time the empowerment of the individual challenges the old grand speakers who are

suddenly detecting fake news echo chambers and filter bubbles everywhere on the Internet Internet based communication allegedly hinders us from the one truth as if newspaper hoaxes propaganda and narrow mindedness were an invention of the Internet The current heated debate over fake news copyright and upload filters shows that we are unsure of how to deal with the newer and more complex phenomena of Internet based speech This is due in no small part to the fact that an important benchmark our constitutional compass is still firmly rooted in the past Constitutions change far more slowly than technologies Societal changes can drive constitutional changes but what about normative content control Today there are already demands for old school clarity truth filters on social media platforms horrendous sums of liability for platforms that encourage overly thorough cleaning up However it is equally true that private individuals regulate they decide what is found on the Internet and who may post on a given platform Accounting for all interests at play and striking a fair balance that avoids both a public and private over and under regulation is a complex matter The authors of this volume not only provide reflections in their highly topical contributions but also share their understanding of what constitutes a fair balance within the larger frame of freedom of speech in a digital age
