Masters Theses in the Pure and Applied Sciences Wade H. Shafer, 2012-12-06 Masters Theses in the Pure

and Applied Sciences was first conceived published and disseminated by the Center for Information and Numerical Data Analysis and Synthesis CINDAS at Purdue University in 1957 starting its coverage of theses with the academic year 1955. Beginning with Volume 13 the printing and dissemination phases of the activity were transferred to University Microfilms Xerox of Ann Arbor Michigan with the thought that such an arrangement would be more beneficial to the academic and general scientific and technical community. After five years of this joint undertaking we had concluded that it was in the interest of all concerned if the printing and distribution of the volumes were handled by an international publishing house to assure improved service and broader dissemination. Hence starting with Volume 18 Masters Theses in the Pure and Applied Sciences has been disseminated on a worldwide basis by Plenum Publishing Corporation of New York and in the same year the coverage was broadened to include Canadian universities. All back issues can also be ordered from Plenum. We have reported in Volume 36 thesis year 1991 a total of 11 024 thesis titles from 23 Canadian and 161 United States universities. We are sure that this broader base for these titles reported will greatly enhance the value of this important annual reference work. While Volume 36 reports theses submitted in 1991 on occasion certain universities do report theses submitted in previous years but not reported at the time.

Alvar Aalto Malcolm Quantrill, 1990-02-01 Alvar Aalto was remarkably inventive in architecture and industrial design. Moreover his command of technology was integrated with a humanistic style of building and like Saarinen and Frank Lloyd Wright he sought an organic synthesis of his structures with their surroundings. Aalto's success in approaching these ideals may account for the extraordinary spread of his influence on an international scale. In this broad study of Aalto's work Malcolm Quantrill assesses its development in terms of two powerful sources: the Finnish National Romantic movement and the Modern movement in architecture. His critique of Aalto's most significant buildings and furniture designs is complemented by photographs of many stages of their creation from the spontaneity of initial sketches to the completed detail. Professor Quantrill first met Alvar and Elissa Aalto at Muuratsalo in June 1953 and he has been studying and photographing Aalto's buildings ever since. His book provides striking insights into the work of one of the greatest architects of the century.
