Courts And Modern Medicine:

The Expert Witness in Islamic Courts Ron Shaham, 2010-04-15 Islam's tense relationship with modernity is one of the most crucial issues of our time. Within Islamic legal systems with their traditional preference for eyewitness testimony, this struggle has played a significant role in attitudes toward expert witnesses. Utilizing a uniquely comparative approach, Ron Shaham here examines the evolution of the role of such witnesses in a number of Arab countries from the premodern period to the present. Shaham begins with a history of expert testimony in medieval Islamic culture, analyzing the different roles played by male experts, especially physicians and architects, and females, particularly midwives. From there, he focuses on the case of Egypt, tracing the country's reform of its traditional legal system along European lines beginning in the late nineteenth century. Returning to a broader perspective, Shaham draws on a variety of legal and historical sources to place the phenomenon of expert testimony in cultural context. A truly comprehensive resource, *The Expert Witness in Islamic Courts* will be sought out by a broad spectrum of scholars working in history, religion, gender studies, and law. *The Oxford Handbook of the History of Medicine* Mark Jackson, 2011-08-25 In three sections, the *Oxford Handbook of the History of Medicine* celebrates the richness and variety of medical history around the world. It explores medical developments and trends in writing history according to period, place, and theme. *Gender and the Mexican Revolution* Stephanie J. Smith, 2009 The state of Yucatan is commonly considered to have been a hotbed of radical feminism during the Mexican Revolution. Challenging this romanticized view, Stephanie Smith examines the revolutionary reforms designed to break women's ties to tradition and religion. Ethics and Law in Modern Medicine D. Vukadinovich, S. Krinsky, 2001-10-31 Los Angeles attorney D. Vukadinovich and S. Krinsky, law Tulane University, present 11 detailed hypothetical case studies as the basis for a group discussion and role playing in a course or seminar on bioethics. Each makes specific reference to appended excerpts from relevant state and federal case law, statutes, and regulations that health care professionals, administrators, and attorneys deal with on a regular basis. Medicine, Public Health and the Qājār State Hormoz Ebrahimnejad, 2004-08-30 The starting point for this volume is a previously unstudied nineteenth-century Persian text concerning hospital reform and of great importance for understanding the history of medical care in nineteenth-century Iran. The volume provides surprising new insights into the interrelation of medical practice, public health, and politics in Qajar Iran. Rather than showing a straightforward replacement, it reveals that Western medicine was assimilated through dialogue into

traditional medical systems It argues that institutional changes preceded intellectual transitions insofar as the first reforms in the medical system were implemented at an institutional level as part of the development of the Q j r state and with the active involvement of traditional court physicians Full edited text with translation and commentary With illustrations

Medicine in Iran H. Ebrahimnejad, 2013-12-17 This book traces how medicine in modern Iran was both theoretically and institutionally transformed in the 19th and 20th centuries It explores the process by which local physicians in a non colonial context assimilated the emerging modern medicine and the institutional devices that accommodated this transition
