Catron,Mary Ann Eaddy,2018-04-15 Seeking Eden promotes an awareness of and appreciation for Georgia s rich garden heritage Updated and expanded here are the stories of nearly thirty designed landscapes first identified in the early twentieth century publication

Garden History of Georgia 1733-1933 Seeking Eden records each garden's evolution and history as well as each garden's current early twenty-first century appearance as beautifully documented in photographs. Dating from the mid-eighteenth to the early twentieth centuries, these publicly and privately owned gardens include nineteenth-century parterres, Colonial Revival gardens, Country Place era landscapes, rock gardens, historic town squares, college campuses, and an urban conservation garden. Seeking Eden explores the significant impact of the women who envisioned and nurtured many of these special places, the role of professional designers including J. Neel Reid, Philip Trammel Shutze, William C. Pauley, Robert B. Cridland, the Olmsted Brothers, Hubert Bond, Owens, and Clermont Lee, and the influence of the garden club movement in Georgia in the early twentieth century.

Courtyards for Modern Living Stephen Crafti, 2008

Gardens have changed significantly over the last couple of decades, and clever architects and designers know that incorporating an outdoor living space can improve a dwelling's aesthetic, not to mention its value. In the 1980s, manicured lawns framed with box hedges and annuals were a common sight. It seemed that both space and water supply were unlimited. *Courtyards for Modern Living* presents beautiful gardens which have been designed for locations around the world that represent the changed reality of drier climates and heralded in a preference for native species, drought-tolerant plants, and even a new popularity of the humble succulent. Contemporary houses also reflect a move towards enjoying larger houses built on smaller sites so that available space is turned into a multifunctional courtyard that is usually accessed from the kitchen and living areas. Author Stephen Crafti's *Beach Houses Down Under H2O* and *Ultimate Urban Makeover* presents an inspired study of what makes outdoor rooms so appealing. Including many tips to guide the architect or the DIY enthusiast, *Courtyards for Modern Living* features courtyards, balconies, and gardens that are extensions of the very house itself.

The Urban Housing Handbook Eric Firley, Victor Deupi, 2023-08-21

THE URBAN HOUSING HANDBOOK An insightful and revealing look at the intersection of housing and urban design. In the newly revised Second Edition of *The Urban Housing Handbook*, Eric Firley and Victor Deupi deliver a vital design and analysis tool.

for housing practitioners students and researchers The book outlines the characteristics of 30 of the most notable housing types from around the world studied against a background of increasing densification Each of the 30 chapters includes a fully explored traditional example followed by one or two contemporary projects of similar spatial configuration that address changing trends in architecture and urban design For this latest edition all contemporary examples have been updated and are now presented on two full spreads per chapter Other features include A rigorous analytical method that classifies the types according to four main categories courtyard houses row houses compounds and apartment buildings A thorough introduction to the relationship between an individual housing unit and the urban fabric that it creates through repetition A strong focus on dense metropolitan projects from around the world A set of key figures that translate visual information into metrics Unique original drawings of illustrated housing accompanied by aerial and street level context photos Conceived for architects and urban designers The Urban Housing Handbook is also an ideal resource for urban planners housing developers builders and housing trust professionals *Energy-efficient Buildings in India* Mili Majumdar,2001-01-01 Accelerated urbanization imposes immense pressure on the dwindling energy sources and fragile ecosystems Yet the resource crunch confronting energy supplies can be alleviated if we design and develop future buildings by incorporating sound concepts of energy efficiency and sustainability Covering 41 projects from India's various climatic zones this book provides thorough insights into the context techniques and benefits of energy efficient buildings The projects highlight design responses to varied climatic conditions appropriate materials and construction methods implementation of energy efficient systems and effective utilization of renewable energy to reduce pressure on grid power This book will inspire architects designers urban planners engineers and students to build for a better tomorrow **The Roman Garden**

Katharine T. von Stackelberg,2009-06-22 This innovative book is the first comprehensive study of ancient Roman gardens to combine literary and archaeological evidence with contemporary space theory It applies a variety of interdisciplinary methods including access analysis literary and gender theory to offer a critical framework for interpreting Roman gardens as physical sites and representations The Roman Garden Space Sense and Society examines how the garden functioned as a conceptual sensual and physical space in Roman society and its use as a vehicle of cultural communication Readers will learn not only about the content and development of the Roman garden but also how they promoted memories and experiences It includes a detailed original analysis of garden terminology and concludes with three case studies on the House of Octavius Quartio and the House of the Menander in Pompeii Pliny's Tuscan garden and Caligula's Horti Lamiani in Rome Providing both an introduction and an advanced analysis this is a valuable and original addition to the growing scholarship in ancient gardens and will complement courses on Roman history landscape archaeology and environmental history **The Function of Style** Farshid Moussavi,2021-04-15 What is the function of style today If the 1970s were defined by Postmodernism and the 1980s by Deconstruction how do we characterize the architecture of the 1990s to the present Some built forms transmit

affects of curvilinearity others of crystallinity some transmit multiplicity others unity some transmit cellularity others openness some transmit dematerialization others weight Does this immense diversity reflect a lack of common purpose In this book acclaimed architect and theorist Farshid Moussavi argues that this diversity should not be mistaken for an eclecticism that is driven by external forces The Function of Style presents the architectural landscape as an intricate web in which individual buildings are the product of ideas which have been appropriated from other buildings designed for the different activities of everyday life ideas which are varied to produce singular buildings that are related to one another but also different This network of connections is illustrated on the cover of this book and in more detail inside Moussavi argues that by embracing everyday life as a raw material architects can change the conventions of how buildings are assembled to ground style and the aesthetic experience of buildings in the micro politics of the everyday The third volume in Moussavi's Function series The Function of Style provides an updated approach to style which can be used as an invaluable and highly productive tool by architects today Assistant Editors Marco Ciancarella Jonathan A Scelsa Mary Crettier Kate Kilalea
