The Business of Plastic Surgery Joshua M. Korman, 2010. Plastic surgeons go through extensive training to become excellent clinicians, but they often end up learning how to practice the business of plastic surgery through trial and error. This unique book, targeted specifically at plastic surgeons and other physicians, seeks to address this glaring oversight and provide guidance from career selection through retirement. It offers many different perspectives while covering a multitude of topics, including the latest know-how on building and maintaining one's website, marketing and monitoring a practice for increased productivity, asset protection, building a surgical suite, and the development of medical inventions. *The Business of Plastic Surgery* features notable authors in the fields of medicine, law, finance, and technology who provide valuable wisdom and expertise. *Tax Court Digest* Lois G. Moore, 1952 *Working in Silicon Valley* Alan Hyde, 2015-06-11. This work examines the relationship between the rapid technological and economic growth characteristic of high technology districts and their distinct labor market institutions: short job tenures, rapid turnover, flat firm hierarchies, weak internal labor markets, high use of temporary labor, unusual uses of independent contracting, little unionization, unusual employee organization (e.g., chat groups), and ethnic organization, unequal income, minimal employment discrimination litigation, flexible compensation, especially stock options, and heavy use of immigrants on short-term visas. The author suggests that while these distinctive labor market institutions are somewhat unorthodox and may present legal problems, they play essential roles in high growth.
