Cowboy Cave:

Pendejo Cave Richard S. MacNeish, Jane G. Libby, Jane G. Liddy, 2003 This account of the archaeology of a cave in southern New Mexico makes a dramatic contribution to the ongoing debate over how long human beings have lived in the Americas The findings presented here show that human settlement may go back as far as 75 000 years before the present whereas the long accepted Clovis dates showed humans only about 12 000 years ago MacNeish and his colleagues subjected the cave its environs and its contents to rigorous interdisciplinary investigation The first section of this volume comprises their reports on the changing environment of the area The second section concentrates on the excavation of the cave's layers presenting the results of radiocarbon dating and describing the evidence of human occupation including friction skin prints and human hair The third section discusses the cultural implications of the materials recovered and suggests how the ancient peoples may have exploited the changing environment and developed different ways of life throughout the Americas before the time of Clovis man No serious discussion of early inhabitants in the New World can disregard the findings presented in this monumental work of scholarship *Indian Rock Art of the Southwest* Polly Schaafsma, 1986-07 The comprehensive book on Indian petroglyphs in the Southwest Library of Congress Subject Headings Library of Congress, 1997 **Mammoths** Larry D. Agenbroad, Lisa W. Nelson, 2002-01-01 Presents information on mammoths and discusses the mysteries that are unlocked from the fossils and mummies that are discovered *The Origins of Southwestern Agriculture* Richard H. Matson, 1991-12 Presents a new model for the origins of Basketmaker II culture based on the evolution of maize use one that focuses on the changes in maize growing rather than on the changes in or to the people involved **Proceedings, Pinyon-Juniper Conference**, 1987 **General Technical Report INT.**, 1986 **Proceedings**, 1986 **The Genesis of FORPLAN** David C. Iverson, 1986 **A Most Indispensable Art** James B. Petersen, 1996 This collection of essays chronicles the diversity and richness of one broad category of traditional material culture fiber industries or textiles among prehistoric and historic Native Americans in eastern North America Such industries which include basketry fabrics cordage and netting played an important role in the economic social and ceremonial life of indigenous cultures However because of the extreme age of the artifacts their fragile nature and unfavorable preservation conditions knowledge of these industries has long been incomplete resulting in a gap in scholarship that this volume does much to address **Anthropological Papers**, 1979 Library of Congress Subject Headings Library of Congress. Cataloging Policy and Support Office, 2003 Packrat Middens Julio L. Betancourt, Thomas R. Van Devender, Paul S. Martin, 2016-01-15 Over the past thirty years late Quaternary environments in the arid interior of western North America have been revealed by a unique source of fossils well preserved fragments of plants and animals accumulated locally by packrats and quite often encased amberlike in large masses of crystallized urine These packrat middens are ubiquitous in caves and rock crevices throughout the arid West where they can lie preserved for tens of thousands of years More than a thousand of these deposits have been dated and

analyzed and middens have supplanted pollen records as a touchstone for studying vegetation dynamics and climatic change in radiocarbon time the last 40 000 years Now similar deposits made by other mammals like hyraxes are being reported from other parts of the world This book brings together the findings and views of many of the researchers investigating fossil middens in the United States Mexico Africa the Middle East and Australia The contributions serve to open a forum for methodological concerns update the fossil record of various geographic regions introduce new applications and display the vast potential for fossil midden analysis in arid regions worldwide The findings presented here will serve to foster regional research and to promote general studies devoted to global climate change Included in the text are more than two hundred charts photographs and maps

People and Plants in Ancient Western North America Paul E. Minnis, 2004 The environmental diversity of North America is astounding from circumpolar tundra with a small number of plants more than a few centimeters tall to the lush semitropical forests of the southeastern United States and the Caribbean Basin No less remarkable is the record of plant usage by the various indigenous peoples who have been living here for more than 12 000 years For the vast majority of this time their livelihood food shelter fuel and medicine depended on their knowledge and use of the plants that surrounded them The most comprehensive overview in more than half a century on the interconnectedness of people and plants this book and its companion volume *People and Plants in Ancient Eastern North America* present the latest information on three major topics the uses of native plants the history of crops and their uses and the impact of humans on their environment They not only contribute to our understanding of the lives of prehistoric people but also serve as guides for designing sustainable living today

Cenozoic Vertebrate Tracks and Traces Spencer G. Lucas, Justin A. Spielmann, Martin G. Lockley, 2007

Zuni Origins David A. Gregory, David R. Wilcox, 2009-12-01 The Zuni are a Southwestern people whose origins have long intrigued anthropologists This volume presents fresh approaches to that question from both anthropological and traditional perspectives exploring the origins of the tribe and the influences that have affected their way of life Utilizing macro regional approaches it brings together many decades of research in the Zuni and Mogollon areas incorporating archaeological evidence environmental data and linguistic

analyses to propose new links among early Southwestern peoples The findings reported here postulate the differentiation of the Zuni language at least 7 000 to 8 000 years ago following the initial peopling of the hemisphere and both formulate and test the hypothesis that many Mogollon populations were Zunian speakers Some of the contributions situate Zuni within the developmental context of Southwestern societies from Paleoindian to Mogollon Others test the Mogollon Zuni hypothesis by searching for contrasts between these and neighboring peoples and tracing these contrasts through macro regional analyses of environments sites pottery basketry and rock art Several studies of late prehistoric and protohistoric settlement systems in the Zuni area then express more cautious views on the Mogollon connection and present insights from Zuni traditional history and cultural geography Two internationally known scholars then critique the essays and the editors present a new research design for pursuing the question of Zuni origins By taking stock and synthesizing what is currently known about the origins of the Zuni language and the development of modern Zuni culture Zuni Origins is the only volume to address this subject with such a breadth of data and interpretations It will prove invaluable to archaeologists working throughout the North American Southwest as well as to others struggling with issues of ethnicity migration incipient agriculture and linguistic origins
