Coxeter Matroids Alexandre V. Borovik, Izrail M. Gelfand, Neil White, 2003-07-11 Matroids appear in diverse areas of mathematics from combinatorics to algebraic topology and geometry and Coxeter Matroids provides an intuitive and interdisciplinary treatment of their theory In this text matroids are examined in terms of symmetric and finite reflection groups also symplectic matroids and the more general coxeter matroids are carefully developed The Gelfand Serganova theorem which allows for the geometric interpretation of matroids as convex polytopes with certain symmetry properties is presented and in the final chapter matroid representations and combinatorial flag varieties are discussed With its excellent bibliography and index and ample references to current research this work will be useful for graduate students and research mathematicians

D. Wensley, 2003-07-24 The British Combinatorial Conference is held every two years and is a key event for mathematicians worldwide working in combinatorics In June 2003 the conference was held at the University of Wales Bangor The papers contained here are surveys contributed by the invited speakers and are of the high quality that befits the event There is also a tribute to Bill Tutte who had a long standing association with the BCC The papers cover topics currently attracting significant research interest as well as some less traditional areas such as the combinatorics of protecting digital content They will form an excellent resource for established researchers as well as graduate students who will find much here to inspire future work **Coxeter Matroids** Richard F.
