competitive advantages and to satisfy and retain valuable customers This is particularly true for middle and lower management Hence value creation for customers finds itself opposed to value creation for shareholders A conflict that appears to find its resolution only in a consequent consideration of customer relationships as investment objects whose continuation or intensification must be justified through an evaluation of economic efficiency Against this background systematic customer valuations become indispensable in order to obtain segmented and efficient market development and to enable a supplier to substantially ensure the availability of the critical resource customers Based on the fundamentals of value based management theory value based marketing and the reciprocal character of customer orientation the author examines the coheren
