Diffusion of Innovations, 4th Edition Everett M. Rogers, 2010-07-06 Since the first edition of this landmark book was published in 1962 Everett Rogers's name has become virtually synonymous with the study of diffusion of innovations according to Choice The second and third editions of *Diffusion of Innovations* became the standard textbook and reference on diffusion studies Now in the fourth edition Rogers presents the culmination of more than thirty years of research that will set a new standard for analysis and inquiry The fourth edition is 1 a revision of the theoretical framework and the research evidence supporting this model of diffusion and 2 a new intellectual venture in that new concepts and new theoretical viewpoints are introduced This edition differs from its predecessors in that it takes a much more critical stance in its review and synthesis of 5 000 diffusion

publications During the past thirty years or so diffusion research has grown to be widely recognized applied and admired but it has also been subjected to both constructive and destructive criticism This criticism is due in large part to the stereotyped and limited ways in which many diffusion scholars have defined the scope and method of their field of study Rogers analyzes the limitations of previous diffusion studies showing for example that the convergence model by which participants create and share information to reach a mutual understanding more accurately describes diffusion in most cases than the linear model Rogers provides an entirely new set of case examples from the Balinese Water Temple to Nintendo videogames that beautifully illustrate his expansive research as well as a completely revised bibliography covering all relevant diffusion scholarship in the past decade Most important he discusses recent research and current topics including social marketing forecasting the rate of adoption technology transfer and more This all inclusive work will be essential reading for scholars and students in the fields of communications marketing geography economic development political science sociology and other related fields for generations to come

Tackling Problem Drug Use Great Britain: Parliament: House of Commons: Committee of Public Accounts,2010 There are 330 000 problem drug users in England They are estimated based on research covering the 2003 04 period to cost society over 15 billion a year 13 9 billion of which is due to drug related crime Fully one quarter of all problem drug users are hard core offenders for whom drug treatment is ineffective and indeed whose offending has sharply increased after entering treatment It is of particular concern that measures to cut problem drug use by young people are having limited effect Preventing the young from descending into problem drug use is an essential part of bringing down the number of problem drug users in future In 2008 the Government introduced a 10 year cross departmental drug strategy

to tackle problem drug use which it defined as use of opiates mainly heroin and or crack cocaine The Home Office has overall responsibility for the strategy with a number of other government departments and agencies at national regional and local levels sharing responsibility for its delivery Central and local government collectively spend 1 2 billion a year to deliver the measures set out in the strategy Given the public money spent on the strategy and the cost to society it is unacceptable that there has not been sufficient evaluation of the programme of measures in the strategy and that it is not known if the strategy is directly reducing the overall cost of drug related crimes Following a recommendation made by the National Audit Office the Home Office has agreed to produce an overall framework to evaluate and report on the value for money achieved from the strategy with initial results from late 2011 Signs of Effectiveness II ,1994 The Drug Problem in New Hampshire United States.
