Airline Labor Relations In The Global Era The New Frontier:

Airline Labor Relations in the Global Era Peter Cappelli, 1995 Emerging from a 1993 conference on airline labor relations convened by the National Mediation Board this volume provides a comprehensive discussion of the problems facing the airline industry the significance of globalization the impact of deregulation and labor relations and possible solutions The lasting contribution of this volume may be its use to historians as they try to understand what the players were thinking in the early 1990s as the industry embarked on another era of transformation from the introduction Paper edition unseen 18 95 Annotation copyright by Book News Inc Portland OR

Evolution of International Aviation Dawna L. Rhoades, 2008 This book has two aims First it lays out the forces that shaped the international aviation industry and changed the rules in the drive for liberalization Second it looks at the choices facing the airline industry in general and the international aviation industry in particular This second edition is thoroughly revised from the 2003 original in light of many significant developments in and affecting the industry during the intervening years

Evolution of International Aviation Professor Dawna L Rhoades, 2014-11-28 As with the previous two editions *Evolution of International Aviation* reviews the historical development of the international aviation system From this foundation it then provides an updated and expanded account of the current state of the aviation and aerospace industry including profitability consolidation and merger activity New to this edition the book broadens the coverage of the industry segments airlines air cargo and manufacturing to include the emerging commercial space sector Because this book is intended for both the interested amateur and the more serious student references are provided in the text and at the end of each chapter to allow for further in depth study The third edition also adds to each chapter a set of learning objectives and a concluding series of questions for discussion

Issues Paper for Discussion at the Tripartite Meeting on Civil Aviation, 2002 The events of 11 September 2001 have had a dramatic impact on the aviation industry and precipitated a major crisis in the industry The Director General of the ILO convened a Think Tank on the Impact of the 11 September Events for Civil Aviation The Think Tank which was held in Geneva brought together government employer and worker experts as well as independent and industry experts from the civil aviation industry for intensive discussions on the impact the crisis was having on the industry

Employment with a Human Face John W. Budd, 2018-07-05 John W Budd contends that the turbulence of the current workplace and the importance of work for individuals and society make it vitally important that employment be given a human face Contradicting the traditional view of the employment relationship as a purely economic transaction with business wanting efficiency and workers wanting income Budd argues that equity and voice are equally important objectives The traditional narrow focus on efficiency must be balanced with employees entitlement to fair treatment equity and the opportunity to have meaningful input into decisions voice he says Only through a greater respect for these human concerns can broadly shared prosperity respect for human dignity and equal appreciation for the competing human rights of property and labor be

achieved Budd proposes a fresh set of objectives for modern democracies efficiency equity and voice and supports this new triad with an intellectual framework for analyzing employment institutions and practices In the process he draws on scholarship from industrial relations law political science moral philosophy theology psychology sociology and economics and advances debates over free markets globalization human rights and ethics He applies his framework to important employment related topics such as workplace governance the New Deal industrial relations system comparative industrial relations labor union strategies and globalization These analyses create a foundation for reforming employment practices social norms and public policies In the book s final chapter Budd advocates the creation of the field of human resources and industrial relations and explores the wider implications of this renewed conceptualization of industrial relations

Effects of Deregulation on Safety Vicki Bier,James Joosten,David Glyer,Jennifer Tracey,Michael Welsh,2012-12-06 *Effects of Deregulation on Safety* provides a comprehensive overview of the safety experiences of these three case study industries and their implications for the U S nuclear power industry The treatment of the subject is not highly technical and hence is accessible to a wide range of readers with interests in the subject matter The book draws on literature from roughly 250 references ranging from brief news articles to book length studies of deregulation in a particular industry as well as original in depth interviews with representatives of all three case study industries This wealth of empirical background information allows the book to go beyond mere speculation about the possible adverse safety consequences of deregulation to identify situations in which particular adverse safety consequences actually occurred The experience of the case study industries indicates that economic deregulation need not be incompatible with a reasonable safety record especially in those aspects of safety that are positively related to productivity But that safety also cannot be taken for granted after deregulation Careful management attention is needed in order to avoid the types of safety problems that were associated with deregulation in the case study industries

Taking Stock of Air Liberalization Marc Gaudry,Robert Mayes,2012-12-06 Taking Stock of Air Liberalization is about Technology Economy and Policy TEP in the airline industry Ten years ago the practical collaboration was begun of bringing together people who belonged to the complementary streams of economic analysis and policy analysis presented int his book During this time we opened discussions on the relationship between transportation technology transportation economics and transportation policy under the general auspices of the Canadian Royal Commission on National Passenger Transportation Working over a 40 month period 1989 1992 this Commission took stock of transportation and produced an up to date tat de la question and policy framework Hyndman et al 1992 Clearly the project committee s discussions on air policy over the period 1995 1997 see Chapter 8 outlined the possibilities for a mechanism to understand the differences about the desirability of air liberalisation as well as the possible TEP interactions in this area This led to an exploratory first formulation and computer programme HLB 1997 incorporating

the approach outlined in Chapter 15 A joint celebration of the CRT's 25th birthday and Transport Canada's 60th birthday seemed appropriate to bring together the various streams Part I of Taking Stock of Air Liberalization looks at the record and Part II focuses on specific impacts of policies Policy formulation Part III and the required tools Part IV Modelling Demand are also discussed in this context The book ends with perspectives in Part V The Future Market Structure and Public Policy The competition among airlines is rapidly spreading to the competition among airports and the difficult regulation of these strategic spatial monopolies which is introduced in Chapter 13 is now attracting research activity The next discussion in the airline industry will be the role of airports

Crisis Management in Tourism Eric Laws, Bruce Prideaux, K. S. Chon, 2007 Using examples from the UK Europe America Australia and Asia this book provides an analysis of the latest thinking and practice in dealing with extreme and sudden reductions in demand for specific tourist destinations or products It shows that managerial responses including problem solving and market recovery steps vary in effectiveness and that recovery may be slow after initial problems are overcome

The Impact of 9/11 on Business and Economics M. Morgan, 2009-08-31 The Impact of 9/11 on Business and Economics is the second volume of the six volume series The Day that Changed Everything edited by Matthew J Morgan The series brings together from a broad spectrum of disciplines the leading thinkers of our time to reflect on one of the most significant events of our time

Air Transport in the 21st Century John F. O'Connell, George Williams, 2016-12-05 Airlines are buffeted by fluctuating political and economic landscapes ever changing competition technology developments globalization increasing deregulation and evolving customer requirements As a consequence all sectors of the air transport industry are in a constant state of flux The principle aim of this book is to review current trends in the airline industry and its related suppliers thereby providing an insight into the forces that are changing its dynamics The factors that are reshaping the structure of the industry are examined with a view to identifying the key issues whose impact will be critical in the future The book features two very distinct sections The first contains short contributions from industry executives at CEO VP level from airlines aircraft engine manufacturers safety and navigational provider organisations who have set out their take of where the airline industry is heading This commercial input sets the scene for the book and provides the bridge to the second section which is composed of 18 chapters written by distinguished academic authors Each chapter presents a valuable insight into a specific area of the air transport industry including airlines airports cargo deregulation the environment navigation strategy information technology security and tourism The shared objective of the authors is to describe and explain the core competencies that are determining the current shape of the industry and to examine the forces that will change its direction going forward The book is written in a management style and will appeal to all levels of personnel who work for airlines across the world It is also written for airport authorities aerospace manufacturers regulatory and government transportation agencies researchers and students of aviation management transport studies tourism and the wider air transport industry

Managing Tourism and Hospitality Services B. Prideaux, Gianna Moscardo, Eric Laws, 2006-09-14 The aim of this book is to enhance theoretical and practical understanding of quality management in tourism and hospitality It provides a benchmark of current knowledge and examines the range of research methods being applied to further develop tourism and hospitality service management research It is hoped that this book will stimulate new research questions by highlighting tensions and challenges in the area

The 1980s Kimberly R. Moffitt, Duncan A. Campbell, 2011 As we approach twenty years since the end of the 1980s we have the opportunity to see the decade in perspective and are in a position to question the glib assumption that the 1980s were a mere conservative foil to the 1960s The 1980s A Critical and Transitional Decade edited by Kimberly R Moffitt and Duncan A Campbell places its topics within the context of a decade described as both critical and transitional because the 1980s in many respects marked the end of one era and the beginning of another For example the Reagan presidency the end of the Cold War MTV and the appearance of the personal computer all reflect a legacy of political cultural and social transformation of the United States and the world and took place specifically within the 1980s The function of this interdisciplinary volume is not to simply highlight the significant phenomena of the period but rather demonstrate how so many apparently disparate events were in fact closely inter related and also products of their age The 1980s is a holistic analysis of the decade that focuses on major turning points developments in literature art entertainment politics and social experimentation The 1980s A Critical and Transitional Decade edited by Kimberly R Moffitt and Duncan A Campbell is a groundbreaking and stand alone introductory volume that is unapologetically interdisciplinary in nature and encourages students to explore topics of the decade often overlooked or grouped together with other more memorable decades such as the 1920s or 1960s

One Hundred Years of Air Power and Aviation Robin Higham, 2003 In this precise interpretive and informative volume Higham looks at everything from the roots of strategic bombing and tactical air power to the lessons learned and unlearned during the invasion of Ethiopia the war in China and the Spanish Civil War He also considers the problems posed by jet aircraft in Korea and the use of Patriot missiles in the Persian Gulf He covers anti guerrilla operations doctrine industrial activities and equipment as well as the development of commercial airlines
