The book provides a comprehensive overview of current practices and future directions in airline revenue management. It explains state of the art revenue management approaches and outlines how these will be augmented and enhanced through modern data science and machine learning methods in the future. Several practical examples and applications will make the reader familiar with the relevance of the corresponding ideas and concepts for an airline commercial organization. The book is ideal for both students in the field of airline and tourism management as well as for practitioners and industry experts seeking to refresh their knowledge about current and future revenue management approaches as well as to get an introductory understanding of data science and machine learning methods. Each chapter closes with a checkpoint allowing the reader to deepen the understanding of the contents covered. This textbook has been recommended and developed for university courses in Germany, Austria and Switzerland.

Quantitative Methods in Aviation Management Tony Webber, 2023-01-24. This book applies tried and trusted statistical and analytical tools to aviation applications. It is written for aviation analysts and management who must extract actionable insights from large volumes of data and need the right statistical and analytical methods to do so. It will also appeal to undergraduate and postgraduate students of aviation management who will require an understanding of statistical and analytical methods when they begin their career in aviation and are awash with large volumes of data through which they must wade. For aviation analysts, managers and students to implement the techniques that are being presented in this book, they must be combined with the right software. It is for this reason that readers are taught how to use up to 40 Microsoft Excel functions to implement many of the techniques and they are also introduced to the econometrics software EViews.

Airline Operations and Management Gerald N. Cook, Bruce G. Billig, 2017-02-03. Airline Operations and Management: A Management Textbook is a survey of the airline industry mostly from a managerial perspective. It integrates and applies the fundamentals of several management disciplines, particularly economics, operations, marketing and finance, in developing the overview of the industry. The focus is on tactical rather than strategic management that is specialized or unique to the airline industry. The primary audiences for this textbook are both senior and graduate students of airline management, but it should also be useful to entry and junior level airline managers and professionals seeking to expand their knowledge of the industry beyond their own functional area.

Modeling Applications in the Airline Industry Ahmed Abdelghany, Khaled Abdelghany, 2016-04-15. Modeling Applications in the Airline Industry explains the different functions and tactics performed by airlines during their planning and operation phases. Each function receives a full explanation of the challenges it brings and a solution methodology is presented, supported by numerical illustrative examples wherever possible. The book also highlights the main limitations of current practice and provides a brief description of future work related to each function. The authors have filtered the rich literature of airline management to include only the research that has actually been adopted by the airlines, giving a genuinely accurate

representation of real airline management and its continuing development of solution methodologies The book consists of 20 chapters divided into 4 sections Demand Modeling and Forecasting Scheduling of Resources Revenue Management Irregular Operations Management The book will be a valuable source or a handbook for individuals seeking a career in airline management Written by experts with significant working experience within the industry it offers readers insights to the real practice of operations modelling In particular the book makes accessible the complexities of the key airline functions and explains the interrelation between them Airline Marketing and Management Stephen Shaw, 2020-09-10 Through six previous editions Airline Marketing and Management has established itself as the leading textbook for students of marketing and its application to today's airline industry as well as a reference work for those with a professional interest in the area Carefully revised the seventh edition of this internationally successful book examines an exceptionally turbulent period for the industry It features new material on Changes in customer needs particularly regarding more business travellers choosing or being forced to travel economy and analysis of the bankruptcy of All Business Class airlines An explanation of the US EU Open Skies agreement and analysis of its impact The increase in alliance activity and completion of several recent mergers and the marketing advantages and disadvantages that have resulted Product adjustments that airlines must make to adapt to changes in the marketing environment such as schedule re adjustments and the reconfiguration of aircraft cabins Changes in pricing philosophies with for example airlines moving to A La Carte pricing whereby baggage catering and priority boarding are paid for as extras Airline websites and their role as both a selling and distributing tool The future of airline marketing A review of the structure of the air transport market and the marketing environment is followed by detailed chapters examining business and marketing strategies product design and management pricing and revenue management current and future distribution channels and selling advertising and promotional policies The reader will benefit from greater understanding of both marketing and airline industry jargon and from knowledge obtained regarding the extraordinary strategic challenges now facing aviation Written in a straightforward easy to read style and combining up to date and relevant examples drawn from the worldwide aviation industry this new edition will further enhance the book's reputation for providing the ideal introduction to the subject *Designing and Executing Strategy in Aviation Management* Triant G.
