Optimization Based Clearance of Flight Control Laws Andreas Varga, Anders Hansson, Guilhem Puyou, 2011-09-28 This book summarizes the main achievements of the EC funded 6th Framework Program project COFCLUO Clearance of Flight Control Laws Using Optimization This project successfully contributed to the achievement of a top level objective to meet society s needs for a more efficient safer and environmentally friendly air transport by providing new techniques and tools for the clearance of flight control laws This is an important part of the certification and qualification process of an aircraft a costly and time consuming process for the aeronautical industry The overall objective of the COFCLUO project was to develop and apply optimization techniques to the clearance of flight control laws in order to improve efficiency and reliability In the book the new techniques are explained and benchmarked against traditional techniques currently used by the industry The new techniques build on mathematical criteria derived from the certification and qualification requirements

together with suitable models of the aircraft The development of these criteria and models are also presented in the book Because of wider applicability the optimization based clearance of flight control laws will open up the possibility to design innovative aircraft that today are out of the scope using classical clearance tools Optimization based clearance will not only increase safety but it will also simplify the whole certification and qualification process thus significantly reduce cost The achieved speedup will also support rapid modeling and prototyping and reduce time to market *Subject Guide to Books in Print* ,1984 Cities and Their Vital Systems Advisory Committee on Technology and Society,1989 Cities and Their Vital Systems asks basic questions about the longevity utility and nature of urban infrastructures analyzes how they grow interact and change and asks how when and at what cost they should be replaced Among the topics discussed are problems arising from increasing air travel and airport congestion the adequacy of water supplies and waste treatment the impact of new technologies on construction urban real estate values and the field of telematics the combination of computers and telecommunications that makes money machines and national newspapers possible Annual Report (technical) of the Central Board of Irrigation, India India.
