López, 2011-10-01 Part of the American Literatures Initiative Series Chicano Nations argues that the transnationalism that is central to Chicano identity originated in the global postcolonial moment at the turn of the nineteenth century rather than as an effect of contemporary economic conditions which began in the mid nineteenth century and primarily affected the laboring classes The Spanish empire then began to implode and colonists in the new world debated the national contours of the viceroyalties This is where Marissa K L pez locates the origins of Chicano literature which is now and always has been postnational encompassing the wealthy the poor the white and the mestizo Tracing its long history and the diversity of subject positions it encompasses Chicano Nations explores the shifting literary forms authors have used to write the nation from the nineteenth to the twenty first centuries L pez argues that while national and global tensions lie at the historical heart of Chicana o narratives of the nation there should be alternative ways to imagine the significance of Chicano literature other than as a reflection of national identity In a nuanced analysis the book provides a way to think of early writers as a meaningful part of Chicano literary history and in looking at the nation rather than the particularities of identity as that which connects Chicano literature over time it engages the emerging hemispheric scholarship on U S literature *A Lady's Ride Across Spanish Honduras* Maria Soltera, 1884

**The Acquisition of Spanish** Silvina Montrul, 2004-01-01 This is the first book on the acquisition of Spanish that provides a state of the art comprehensive overview of Spanish morphosyntactic development in monolingual and bilingual situations Its content is organized around key grammatical themes that form the empirical base of research in generative grammar nominal and verbal inflectional morphology subject and object pronouns complex structures involving movement topicalizations questions relative clauses and aspects of verb meaning that have consequences for syntax The book argues

that Universal Grammar constrains all instances of language acquisition and that there is a fundamental continuity between monolingual bilingual child and adult early grammatical systems While stressing their similarities with respect to linguistic representations and processes the book also considers important differences between these three acquisition situations with respect to the outcome of acquisition It is also shown that many linguistic properties of Spanish are acquired earlier than in English and other languages This book is a must read for those interested in the acquisition of Spanish from different theoretical perspectives as well as those working on the acquisition of other languages in different contexts
