Alamogordo Plus Twenty Five Years The Impact Of Atomic Energy On Science:

Alamogordo Plus Twenty-five Years Richard S. Lewis,Jane Wilson,1971 **Atomic Fragments** Mary Palevsky,2000-06-29 Scientists Hans Bethe Edward Teller Joseph Rotblat Herbert York Philip Morrison and Robert Wilson and philosopher David Hawkins responded to Palevsky s personal approach in a way that dramatically expands their previously published statements **BOOK JACKET Professional Journal of the United States Army ,1971** **Quarterly Review of Military Literature ,1971** **A Companion to World War II** Thomas W. Zeiler,Daniel M. DuBois,2012-12-21 A

Companion to World War II brings together a series of fresh academic perspectives on World War II exploring the many cultural social and political contexts of the war Essay topics range from American anti Semitism to the experiences of French African soldiers providing nearly 60 new contributions to the genre arranged across two comprehensive volumes A collection of original historiographic essays that include cutting edge research Analyzes the roles of neutral nations during the war Examines the war from the bottom up through the experiences of different social classes Covers the causes key battles and consequences of the war **Military Review ,1971** **Nature Talks Back** Robert Nadeau,1984 **Elemental Germans**

Christoph Laucht,2012-05-15 Christoph Laucht offers the first investigation into the roles played by two German born emigre atomic scientists Klaus Fuchs and Rudolf Peierls in the development of British nuclear culture especially the practice of nuclear science and the political implications of the atomic scientists work from the start of the Second World War until 1959

Hiroshima Andrew J. Rotter,2008-02-28 The US decision to drop an atomic bomb on the Japanese city of Hiroshima on 6 August 1945 remains one of the most controversial events of the twentieth century However the controversy over the rights and wrongs of dropping the bomb has tended to obscure a number of fundamental and sobering truths about the development of this fearsome weapon The principle of killing thousands of enemy civilians from the air was already well established by 1945 and had been practised on numerous occasions by both sides during the Second World War Moreover the bomb dropped on Hiroshima was conceived and built by an international community of scientists not just by the Americans Other nations including Japan and Germany were also developing atomic bombs in the first half of the 1940s albeit haphazardly Indeed it is difficult to imagine any combatant nation foregoing the use of the bomb during the war had it been able to obtain one The international team of scientists organized by the Americans just got there first As this fascinating new history shows the bomb dropped by a US pilot that hot August morning in 1945 was in many ways the world s offspring in both a technological and a moral sense And it was the world that would have to face its consequences strategically diplomatically and culturally in the years ahead **Bulletin of the Atomic Scientists ,1973** **Dictionary Catalog of the Department Library** United States. Department of the Interior. Library,1969 Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office,1973 **The Weaponsmakers** Jeffrey Schevitz,1979-01-01 This study lets weapons designers producers and testers speak for themselves They speak about their work during the Vietnam War and

about those who criticized them for doing that work In doing so the book increases our understanding of professionals and professionalism by examining the social political and cultural factors that shape career choices and affect attitudes toward jobs and toward employing organizations It creates a typology of the high level engineers and scientists in the industry within an analysis of the overall structure of that industry Persons involved in or opposed to weapons production as well as involved in or opposed to other controversial work will value the difficult to find information presented in this book on the effects of the war on weapons industry personnel The practical conclusions drawn by the author are for government but also for universities research organizations corporations and for those opposed to the whole industry
