Alaskan Maps A Cartobibliography Of Alaska To 18:

Exploring and Mapping Alaska Aleksei Vladimirovich Postnikov, 2015-06-15 Russia first encountered Alaska in 1741 as part of the most ambitious and expensive expedition of the entire 18th century. During the next 126 years the struggle to develop and refine geographic knowledge of the vast region comprising northeastern Asia, the North Pacific and Alaska met with many obstacles including inclement weather, the chain of supply over great distances, the need to train expert navigators and cartographers, and false leads due to spurious voyage accounts. For much of this era critical geographic knowledge was kept as a state secret in Russia and not shared even with the very navigators and cartographers who were developing much needed maps and navigational aids. Despite this a rich cartographic heritage developed to be carried forward into the American era. The traditional Russian cartographic methods were applied to new discoveries in Siberia and beyond. Early fur traders and explorers utilized this system which for a time co-existed with the new cartographic methodology utilized in Europe and adopted for use by the Russia of Peter the Great. It became an age of scientific exploration. Great Britain, France, Spain, but especially Russia sent expeditions. An increasingly complete knowledge of the coasts of North America, with forays into the interior, emerged. Postnikov describes the explorations and richly illustrates how the resulting maps evolved and contributed to the world's knowledge of one of the last great regions of the world to be explored. *From Northeast Passage to Northern Sea Route*, 2022-09-12 The notion of a waterway north of Eurasia conceived in the first half of the sixteenth century remained only a dream for centuries due to ice, unmapped coastlines, and a lack of geographical knowledge. This volume is the first comprehensive scholarly account in English of the slow but steady exploration and commercial exploitation of the Siberian coastal waters, and it proves that this was a truly international endeavour. However, in the end the Northern Sea Route as a through-traverse route came to be used primarily by the Soviet Union, for which it became a crucial vehicle for the geopolitical and economic integration of its vast territories. As an international trade route, the Northern Sea Route is only today about to win its way, essentially as a result of global warming. This being the case, should we rejoice or despair? *Archaeology and the Capitalist World System* Aron L. Crowell, 2013-11-11 This fascinating monograph employs a world system model as the basis for archaeological investigation of Russian America, that relates local findings to global patterns. Author Aron Crowell examines Russian, Spanish, and American historical sources along with the archaeological evidence to uncover a preliterate culture that left no written record of its contact with European colonial powers. Crowell's particular subject is the indigenous Qikertarmiut people of Kodiak Island off the coast of Alaska. The special case of this tribe serves as a microcosm of the history of colonialism, demonstrating how early European capitalism impacted and in some cases destroyed indigenous societies. **Alaska** Marvin W. Falk, 1995 Even Kluwer, with only a sales office in the U.S., prints CiP in their books. A house publishing books for libraries should always display cataloging in publication. Irresponsible. This is another good bibliography in a widely used series. Annotation copyright by Book News Inc, Portland, OR. *Bulletin* -
