The Gavel and Sickle: The Supreme Court, Cultural Marxism, and the Assault on Christianity Anthony Walsh, 2018-01-15 This book addresses the benefits of Christianity for all the degradation of our culture since the 1950s the pernicious effects that cultural Marxism has had on Western cultures and the loss of religious freedom as the Founders envisioned it due to a number of Supreme Court rulings We cannot understand the culture war and cultural debasement until we understand cultural Marxism Cultural Marxism has been hiding in plain sight since the 1930s with the immigration to the United States of a cadre of intellectuals from Germany who brought with them the folderol of critical theory political correctness gender neutrality radical feminism and moral relativism This intellectual moonshine is designed to weaken family structure and individual morality and it has worked The ultimate purpose of cultural Marxism is to destroy Western civilization from within This goal is clearly and unambiguously stated in their books and articles In numerous places in these books and articles cultural Marxists are adamant that if socialism is ever to come to America the two epicenters of Western morality the family and Christianity will have to be destroyed by slow stealthy and incremental attacks on them They have been aided in their efforts by anti Christian rulings by the United States Supreme Court since the 1940s I do not claim in any sense that the Supreme Court is engaged in a conspiracy with cultural Marxists Their rulings have been based on a reading of the Establishment Clause of the First Amendment that its authors would not recognize and have used this clause to eviscerate the Free Exercise Clause America's first freedom The Court has purged Christianity from the public square and in doing so it has unwittingly helped the cultural Marxist agenda by spiritually disarming America

**Einstein's Unfinished Symphony** Marcia Bartusiak, 2017-01-01 A new generation of observatories now being completed worldwide will give astronomers not just a new window on the cosmos but a whole new sense with which to explore and experience the heavens above us Instead of collecting light waves or radio waves these novel instruments will allow astronomers to at last place their hands upon the fabric of space time and feel the very rhythms of the universe These vibrations in space time or gravity waves are the last prediction of Einstein's general theory of relativity yet to be observed directly They are his unfinished symphony waiting nearly a century to be heard When they finally reveal themselves to astronomers we will for the first time be able to hear the cymbal crashes from exploding stars tune in to the periodic drumbeats from swiftly rotating pulsars listen to the extended chirps from the merger of two black holes and eavesdrop on the remnant echoes from the mighty jolt of the Big Bang itself When Einstein introduced general relativity in 1915 it was hailed as a momentous conceptual achievement Einstein attained celebrity status But once scientists verified what they could of the theory given the scant experiments available at the time general relativity became largely a theoretical curiosity writes Marcia Bartusiak Now after decades of technological advancement general relativity is being tested with unprecedented accuracy It even affects our everyday lives Satellites used by both travelers and soldiers to peg their positions require constant corrections of Einsteinian precision Meanwhile the first gravity wave telescopes Including the LIGO facility are about to come alive
