Alcohol, Cell Membranes, and Signal Transduction in Brain Christer Alling, Ivan Diamond, Steven W. Leslie, Grace Y. Sun, W. Gibson Wood, 2012-12-06 Alcohol abuse and alcoholism are international problems whose costs economical ly psychologically and medically have been well documented Alcohol is a unique drug in that the effects of excessive use can have a deleterious effect on most if not all organs of the body The brain is one of the organs most affected by excessive alcohol consumption Effects on the brain can be seen in cognitive function brain structure and neurochemistry Over the past few years there have been significant advances made in understanding how alcohol affects brain neurochemistry This book examines four major areas i e membrane lipids receptors and ion channels second messengers and gene expression where significant advancements have been made The book is divided into four sections based on the four major areas In each section data are examined that cover a range of approaches from in vitro to in vivo studies The section on membrane lipids includes recent developments in how ethanol affects membrane cholesterol domains polyunsaturated fatty acids the cause and consequences of phosphatidylethanol formation and the modulation of membrane protein function by lipid protein interaction The second section comprises chapters on NMDA and 5 HT3 receptors including new aspects on alcohol neurotoxicity and the molecular heterogeneity that may underlie differences in alcohol sensitivity as well as chapters on GABA gated chloride flux and calcium channels

**Alcohol's Effect on Organ Function** Dianne M. Welsh, 1998-12 Presents a selection of articles on the effect of alcohol use on organ function Topics include alcohol s effects on liver function alcohol related pancreatic damage alcohol and the cardiovascular system alcohol s contribution to compromised immunity the hemotological complications of alcoholism the endocrine system and alcohol related hormonal imbalances impairments of brain and behavior alcohol s role in gastrointestinal tract disorders and alcohol s impact on kidney function Diagrams

*Alcohol and Glial Cells* Francine E. Lancaster, 1994 Presents the latest research findings on and introduces new research techniques for the study of the effects of alcohol on glial cells Includes reviews of research findings and techniques used to study astrocytes oligodendroglia and microglia findings on the influence of alcohol on glial cells during development the role of astrocytes in alcohol induced damage of the neuroimmune system the role of glial cells in alcohol induced neuropathology the involvement of astrocytes in hepatic encephalopathy new imaging techniques capable of separating glial and neuronal images in alcohol induced brain atrophy and information on alcoholic induced disturbances in neurosteroid production by glial cells

*Alcohol Research & Health* ,2001 **Research on the Neurobiology of Alcohol Use Disorders** Leo Sher, 2008 This book describes the neurobiological mechanisms of alcohol abuse and dependence including the role of serotonergic dopaminergic noradrenergic and hypothalamic pituitary adrenal systems in alcohol use disorders and the results of neuroimaging studies are presented The neurobiology of comorbidity of alcohol use disorders with other psychiatric disorders are also discussed Research on the neurobiology of alcohol abuse and dependence is very important

Therefore this book will be of interest to biomedical researchers physicians and other clinicians students and anyone who is interested in the mechanisms of addictive disorders Alcohol, Drugs of Abuse, and Immune Functions Ronald R.

Watson,1995-05-04 Substance abusers are an immunocompromised population vulnerable to a wide array of new and resurgent infectious diseases in spite of modern treatment For example opportunistic infections like tuberculosis are the principal cause of morbidity and mortality in HIV positive patients Alcohol and drug induced disorders are wide ranging gaining prominence as the spectrum of emerging diseases broadens Alcohol Drugs of Abuse and Immune Functions reviews the role of these immunosuppressants as cofactors in disease It covers the basic biology and immunology of impairments to defense against infectious disease Alcohol and drug use is consistently associated with immunosuppression although it isn't known if it is the substance itself a metabolite or an indirect effect that alters disease resistance This text explores the advances toward answering this question examines alcohol in different settings its relationship to important cells and the effects it can have on vital organs such as the liver and the lungs Alcohol, Immunity, and Cancer Raz Yirmiya,Anna N.

Taylor,1992-11-18 Chronic alcoholism afflicts approximately 7% of the adult population of the United States and an even larger proportion in some other countries Among the most devastating health problems associated with alcoholism are increased morbidity and mortality from infections and cancer Alcohol Immunity and Cancer is the first book devoted entirely to presenting up to date comprehensive reviews on how the deleterious effects of alcohol consumption impact the immune system and increase the risk of developing many types of cancer Topics covered include the effects of alcohol on cytokine activity the modulation of natural killer cell activity by alcohol fetal alcohol exposure and immunity alcohol and hepatic carcinogenesis and alcohol and cancer of the pancreas Alcohol Immunity and Cancer will be invaluable for immunologists pathologists toxicologists microbiologists biochemists endocrinologists and neuroscientists interested in alcohol research It will also benefit medical experts and general practitioners who need to know the role alcohol may play in the health and disease of their patients **Special Report to the U.S. Congress on Alcohol and Health from the Secretary of Health and Human Services** ,1997

The Pharmacology of Alcohol and Alcohol Dependence Henri Begleiter,Benjamin Kissin,1996 This is a comprehensive review of the pharmacological effects of alcohol and the mechanisms underlying the pathogenesis of alcoholism The book draws on general pharmacology neuropharmacology and alcohol studies to explore its theme The second volume in the ALCOHOL AND ALCOHOLISM series it focuses on the pharmacologic mechanisms underlying the development of alcoholism The first section on basic pharmacology is concerned with those aspects that are common to all of alcohol's effects These include pharmacokinetics general metabolism and cross tolerance The second section on neuropharmacology describes the effects of alcohol on various brain functions including circulation and metabolism The third section provides an in depth review of the neurobiology of physical dependence withdrawal and physiological tolerance The book as a whole gives a comprehensive and authoritative picture of the complex pharmacologic

actions of alcohol particularly on the nervous system For clinicians and researchers in the field of alcohol and alcoholism it will serve as a fundamental reference

**Neurobiology of Alcohol Dependence** Antonio Noronha, Changhai Cui, Robert Adron Harris, John C. Crabbe, 2014-05-02 Recent scientific advances have provided substantial information on the brain circuits and pathways relevant to various aspects of dependence Neurobiology of Alcohol Dependence highlights the most recent data at the molecular cellular neurocircuitry and behavioral levels fostering an understanding how neuroplasticity and neuroadaptation occur and how different neural pathways and neurocircuits contribute to dependence Highlights recent advances in understanding alcohol addiction from molecular cellular neurocircuitry and behavioral levels Integrates several emerging areas of research and discusses the application of novel research techniques to the understanding of alcohol dependence Chapters authored by leaders in the field around the globe the broadest most expert coverage available

**Toward a Molecular Basis of Alcohol Use and Abuse** B. Jansson, H. Jörnvall, U. Rydberg, L. Terenius, B.L. Vallee, 2013-03-13 The 39 chapters in this volume consider subjects ranging from genetics markers and molecular biology of alcoholism to clinical observations and treatment The aim is to integrate pertinent information from the fields of molecular and cell biology with view to establishing a molecular basis of alcohol use and abuse An initial preview summarizes historical aspects of alcohol use and subsequent chapters concern novel drugs pharmacological aspects gene structures cloning and enzymatic properties Also contributions by non traditional alcohol scientists have been included in this collection in order to highlight possible interaction and parallels between different fields Novel results of particular interest include up dated summaries on receptors enzymes and other proteins as well as corresponding gene structures and regulation setting the basis for distinguishing markers and pinpointing further possible pharmacological treatments

**Alcohol, Pregnancy and the Developing Child** Hans-Ludwig Spohr, Hans-Christoph Steinhausen, 1996-08-22 This authoritative 1996 publication was the first to review comprehensively the important relationship between maternal alcohol abuse during pregnancy and the resulting in utero damage to the child and the results of this damage during the development of affected children It includes important contributions by leading and internationally acclaimed clinicians and researchers The first part of the book discusses clinical issues of alcohol teratogenicity the clinical picture of fetal alcohol syndrome and the epidemiology of maternal alcohol abuse and the developmental outcome of the children The second part addresses pathogenesis and neuropathology whilst part three reviews developmental issues in the growing child The final part evaluates approaches to rehabilitation and intervention and reviews social and public health issues This comprehensive account will be of interest to gynaecologists obstetricians midwives neonatologists and paediatricians and for child and adolescent psychiatrists and psychologists
