**Allied Fighters of World War II** Bill Gunston,1992      United States Army in World War II. ,1947      *Ultimate Allied Fighters of the Second World War* Justo Miranda,2024-01-07 During the five years of the Second World War the power of engines and speed of aircraft increased as much as it did during twenty years of peacetime Conventional aircraft and engines reached the limits marked in the original design and surpassed them very fast The basis for this huge achievement was exotic fuels short lived artificially overpowered engines propellers with four five and even six blades and thinner wings with special sections of laminar flow Then the faster Allied fighters began to be attacked by a demon that lived in the air scientists called it compressibility buffeting and different type of aircraft suffered it at different speeds and manifested itself in different ways The American and British designers never understood the true causes behind the aerodynamic phenomenon They were forced to adopt brute force solutions by increasing engine power on the turbojet powered fighters leaving in the background the research on the last projects of fighters driven by monster piston engines The purpose of this book is to present them to the public for its notable interest      *The Army Air Forces in World War II: The Pacific, Guadalcanal to Saipan, August 1942 to July 1944* ,1948      United States Army in World War II.: Cartwheel: the reduction of Rabaul, by John Miller, Jr ,1948      *United States Army in World War II.: The Mediterranean theater of operations* United States. *Wings That Stay On* Edward V. Coggins, 2000 From the Preface This book was required As a former professor of military history at the American Military University AMU and a retired USAF Colonel I wanted to teach a course on the effects of fighter aviation in war In addition I wanted to create a course that was a hands on approach to fighter aviation history Having flown USAF fighters for more than 20 years I felt I had a good working knowledge of fighter aviation but when I researched the subject I found I would have to ask my students to read scores of books to provide the background they would need There was no single source book that covered everything I wanted to cover I determined to write that book I wanted to write a straightforward book in plain language that would not bore fighter pilots and at the same time that would be simple enough to be attractive to laymen as well as air power historians That is what I have done I have covered some detailed thoughts about fighter flying in what Southern Americans might call biscuits and gravy language The overriding premise of the text is that the fighter has been the key element in the air power equation and continues in that role today although this role may be changing with the advent of good reliable beyond visual range air to air missiles This view has not been universally held over the years however it is a view that has been held by fighter pilots since the advent of the fighter More and more historians are beginning to support this view Table of Contents World War I Fighter Development Between Wars The Air Wars Between World Wars Fighter Development In World War II The Korean War The Fighter In The Vietnam War The Arab Israeli Wars The India Pakistani Conflicts The Air War In The Falklands Soviet Experience In Afghanistan The Persian Gulf War The Future Summary And Conclusions Appendices Definitions      **Ww II- We Were There** T/Sgt. James Lee Hutchinson EdS, 2022-12-08 WW II books of 50 or more stories of boys on B 17 Flying Fortress crews flying deadly missions with the Eighth Air Force in World War II His writing is based on his teenage combat experiences as a B 17 radio gunner on twenty combat missions with the 490th Bomb group diaries and interviews of veterans of various bomb groups Teenagers who volunteered to fly were trained and went into combat before they could legally vote or buy a drink They signed up for the Army's Air Cadet Program and became a part of the greatest air armada in the world Any of the gunners on a bomber crew were teenagers and twenty four was the average age of pilots bombardiers and navigators Veterans diaries give amazing reports of fighter attacks flak damage and being shot down to become Prisoners of War They were the youngsters who flew daylight bombing missions in the Mighty Eighth and destroyed Germany's military and war industry
