Psychology in Brazil Silvia Helena Koller, 2019-04-16 This book presents an overview of the work of the most important Psychology researchers in Brazil contributing to the internationalization of the discipline and fostering cross cultural approaches in the field Over the last two decades Psychology research has experienced an enormous growth in Brazil which has placed the country among the ten nations with the highest scientific output in the area A big part of this output however remains inaccessible to the majority of the international community because it s mainly published in Portuguese This book intends to overcome this barrier presenting a highly relevant sample of the best Psychology research produced in Brazil to those who are unable to read in Portuguese In each chapter a top Brazilian researcher is invited to present a summary of his her main contributions to the field The result is a rich overview of the main areas in which Brazilian psychologists have concentrated their work over the last decades such as Developmental Psychology Community Psychology Educational and School Psychology Evolutionary Psychology Health Psychology History of Psychology and Social Psychology By putting together such a wide array of topics Psychology in Brazil Scientists Making a Difference offers a rich overview of the research in the country to psychologists educators and social scientists in general interested in cross cultural approaches within the Behavioral Sciences

New Multinational Network Sharing George B. Graen, Joan A. Graen, 2007-10-01 This book employs a network centric approach to the new field of multinational leadership and network sharing Networks go beyond teams but may include teams of various types from homogeneous project teams to multinational strategy teams and every type of team between Conventional wisdom was that nothing larger than a relatively small team could be led effectively because the number of relationships between people is about one half of the square of the size of the team For a team in which every member depends on every other member the number of interdependent relationships becomes overwhelming with relatively small team sizes Fortunately recent technical advances in network analysis and multicultural cooperation have been developed to rescue us from mind boggling bombardments of everyone trying to communicate over all others at once Merely thinking about such a Kafkaesque situation hurts our heads Armed with these two breakthroughs fairly large networks both national and multinational can be led effectively with appropriate selection and

training This book furthers our attempts to make functional networks perform their promise of becoming superteams
