Alone Together:

Alone Together Sherry Turkle, 2011-01-11 A groundbreaking book by one of the most important thinkers of our time shows how technology is warping our social lives and our inner ones Technology has become the architect of our intimacies Online we fall prey to the illusion of companionship gathering thousands of Twitter and Facebook friends and confusing tweets and wall posts with authentic communication But this relentless connection leads to a deep solitude MIT professor Sherry Turkle argues that as technology ramps up our emotional lives ramp down Based on hundreds of interviews and with a new introduction taking us to the present day *Alone Together* describes changing unsettling relationships between friends lovers and families

Gastrospace Matteo Bonotti, Andrea Borghini, Nicola Piras, Beatrice Serini, 2024-09-02 This book explores the moral and political significance of gastrospace the spaces where we eat It adopts an innovative approach combining analytic political philosophy and analytic ontology to lay down the theoretical foundations for a multi and interdisciplinary research agenda on the complex interconnections between food and space Social science and humanities scholars have studied the ties between food consumption and space from multiple angles This book sets up a different and more foundational approach which engages with these bodies of work and integrates them into a coherent framework While taking the reader through a theoretical journey of varying complexities the book also illustrates the social political and cultural significance of gastrospace by surveying an array of examples from diverse historical and geographical contexts It then draws on political philosophy to show that gastrospace are sites of justice and injustice and complements this analysis by developing an ontological model for gastrospace that facilitates a systematic analysis of their social political and cultural significance The book ends with a toolbox for the study of gastrospace that different stakeholders may apply to their respective contexts of intervention This book will appeal to philosophers political scientists food scholars geographers and anyone interested in the intersection between food and space By focusing on a wide range of real world topics related to gastrospace such as racist dress codes family friendly restaurants speakeasies and gendered kitchen designs the book will also be of interest to nonacademic stakeholders such as urban planners policymakers designers managers and consumers

Magic Lands John M. Findlay,1993-09-22 The American West conjures up images of pastoral tranquility and wide open spaces but by 1970 the Far West was the most urbanized section of the country Exploring four intriguing cityscapes Disneyland Stanford Industrial Park Sun City and the 1962 Seattle World s Fair John Findlay shows how each created a sense of cohesion and sustained people s belief in their superior urban environment This first book length study of the urban West after 1940 argues that Westerners deliberately tried to build cities that differed radically from their eastern counterparts In 1954 Walt Disney began building the world s first theme park using Hollywood s movie making techniques The creators of Stanford Industrial Park were more hesitant in their approach to a conceptually organized environment but by the mid 1960s the Park was the nation s prototypical research park and the intellectual downtown for the high technology region that became Silicon Valley In 1960 on the outskirts of Phoenix Del E Webb built Sun City the largest most influential retirement community in the United States Another innovative cityscape arose from the 1962 Seattle World s Fair and provided a futuristic somewhat fanciful vision of modern life These four became magic lands that provided an antidote to the apparent chaos of their respective urban milieus Exemplars of a new lifestyle they are landmarks on the changing cultural landscape of postwar America Happiness, Technology and Innovation Gaël Brulé,Francis Munier,2021-08-27 This book asks what kind of impacts innovations and technology have on subjective well being and happiness It presents the state of the art both in terms of results and theoretical questioning on these topics It proposes a new concept innovation that leads to greater

happiness and highlights new research in this area In so doing it addresses a less researched area in the field of well being research The authors state that notwithstanding the indisputable positive contributions of innovation and technology there are also drawbacks which need equal attention in research This book is of interest to students and researchers of quality of life and well being as well as innovation research **Global Perspectives on Health Communication in the Age of**

Love John Frederick, Eric Lewellen, 2019-03-12 The topic of the Internet is vastly underrepresented in the current literature on the intersection of technology and theology Studies on Internet theology are certainly viewed as a topic of special interest relevant it might be thought only to eccentric academics and tech geeks Yet this book contends that there is no topic more pertinent to our daily walk as contemporary followers of Jesus Christ than the theological implications of the Internet The twelve essays of this volume though standalone pieces also work in conjunction to investigate the themes of community and character formation in the digital realm A host of interrelated sub themes are represented in the book including the application of patristic theology to contemporary Internet praxis a demonology of the Internet virtue ethics in cyberspace and studies that consider the implications of Internet technology on aesthetics personhood and the self Together the chapters work toward a collaborative constructive cruciform theology of the Internet The Internet is more than a supplementary component to our personal lives rather it is a medium of vital connection for the digital communion of the saints through the HTML of cruciform love **The Skillful Team Leader** Elisa MacDonald, 2013-03-13 All teams face hurdles What distinguishes the skillful team leader from a less effective one is his or her approach in overcoming them MacDonald offers a skillful approach to team leadership rooted in values mindset intelligence and skill *HCI International 2016 - Posters' Extended Abstracts* Constantine Stephanidis, 2016-07-04 This is the second volume of the two volume set CCIS 617 and CCIS 618 that contains extended abstracts of the posters presented during the 18th International Conference on Human Computer Interaction HCII 2016 held in Toronto Canada in July 2016 The total of 1287 papers and 186 posters presented at the HCII 2016 conferences was carefully reviewed and selected from 4354 submissions These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems The papers thoroughly cover the entire field of Human Computer Interaction addressing major advances in knowledge and effective use of computers in a variety of application areas The papers included in this volume are organized in the following topical sections web social

media and communities gesture and motion based interaction expressions and emotions recognition and psychophysiological monitoring technologies for learning and creativity health applications location based and navigation applications smart environments and the Internet of Things design and evaluation case studies *Who's Fit to be a Parent?* Mukti Jain
 Campion, 2005-06-29 In recent years the notion of parenting and parenthood have increasingly come under examination from the media and professionals and in particular government and politicians More and more parents are being held to account by society for their failure to deliver the sort of citizens it wants But what are parents supposed to be doing Are there some people that are inherently unfit to be parents and does there exist a body of knowledge that defines fit parenting Who s fit to be a parent covers this highly topical and important subject in a stimulating and accessible way that cuts across numerous professional disciplines and opens up the boundaries between professional and personal expertise on parenting It is essential reading for any professional or student of social work and social policy those working in the voluntary services concerned with the family social policy makers and for anyone interested in understanding what it means to be a parent today **The Life and Adventures of Trobadora Beatrice As Chronicled by Her Minstrel Laura** Irmtraud Morgner, 2000-01-01
 Beatrice awakens after an eight hundred year sleep and travels throughout East Germany with the help of socialist trolley driver Laura Salman **Love in America** Francesca M. Cancian, 1990-08-31 In the last twenty five years Americans have gained considerable freedom in thier personal lives Relationships are now more flexible and self development has become a primary goal for both men and women Most scholars have criticized this trend to greater freedom arguing that it undermines family bonds and promotes selfishness and extreme independence Francesca Cancian is more optimistic In this book she shows that many American couples succeed in combining self development with commitment and that interdependence not independence is their ideal In interdependent relationships love and self development do not conflict but reinforce each other Love in America compares traditional forms of marriage with these newer forms of close relationships Starting with the nineteenth century Cancian shows how gender roles became polarized with love which was identified with emotional expression no practical help being the responsibility of women while self development was regarded as a masculine concern These traditional images of love and relationships are still held by many Americans today even though as Cancian points out this can lead to marital conflict and individual stress and illness By contrast new images of love emphasizing self development for men and women and flexible androgynous roles began to emerge around 1900 accelerating in the 1960s She concludes that this trend to self development and androgyny will continue but that whether it will lead to more interdependent relationships or to more independence and isolation depends partly on economic and political changes in the wider society The evidence for Cancian s argument comes from sociological historical and psychological sources Her book will interest readers in these disciplines as well s appeal to a wide general audience Stuck With The Bossy CEO YERB,
 What could go wrong in Mia s life if she got stuck on an island with her boss after a shipwreck Though Craig is good looking

smart sexy wealthy he is cold arrogant perfectionist bossy a bit of a jerk and engaged to his girlfriend Also he seeks revenge for something that Mia did to him eight years ago that she doesn't quite remember Craig is the only man on the island Will Mia think of him as her dream guy even if he has been so hard on her back in their workplace Can they resist the temptation of being alone together Well what could go wrong right *The Astronaut* Dario Llinares, 2011-05-25 The Astronaut Cultural Mythology and Idealised Masculinity interrogates the historical and cultural dynamics of one of the most revered icons of the 20th century Analysing a diverse range of cultural representations the book postulates the construction of an intertextual mythology through which the astronaut becomes an embodiment of American ideological values and heroic manhood The discursive processes at work in the range of media texts examined serve to embed the astronaut into the cultural imaginary as a largely coherent and uncontested exemplar of idealised masculinity Using a range of interdisciplinary analytical tools the book examines how the social construction of this masculine ideal iterates and naturalises gender hegemony The book situates the astronaut within the context of a modern postmodern theoretical framework linking shifts in gender perspectives to the contradictory narratives and characterisations that inform the mediation of the astronaut In so doing the book argues for a re-evaluation of the often oversimplified use of the term hegemonic masculinity as an anchoring point for the critique of masculinity The strength of this work is its interdisciplinary diversity and its interconnection of a range of themes including gender representation history ideology the postmodern and the media Drawing upon contemporary theoretical debates while redeploying seminal theoretical texts the book offers new cultural interrogations of a highly familiar historical subject

the Table Julia Hurlow, 2020-10-29 When is the last time you sat down for a meal to break bread with other people and experienced peace Throughout the arc of the scriptural narrative the word shalom is used as a way to speak of the way of peace This word shalom embodies the depiction of creation where all things would glorify to the Triune God as well as bear the image of the Triune God who seamlessly embraces love and belonging What if the universal space at a table is where shalom is experienced relationally What if the longing people have for love and belonging can be extended through hospitality at a table Unification can happen when invitations are extended to come participate and communicate at the table as a reflection of the Imago Dei
