Corsini, 1979-08 Alternative Educational Methodologies Ion Albulescu, Catalano Horațiu Roco, 2018-01-23 This volume brings together a number of papers presented at the international conference on Specific Methodologies in Educational Alternatives held in June 2016 at the Bistrița University Extension of the Educational Sciences Department of Babeș-Bolyai University Cluj Napoca Romania. The event served to promote the most recent theoretical and practical findings related to educational alternatives and attracted the attendance of over 250 theorists and experts in the field. Alternative Education Yoshiyuki Nagata, 2007-03-30 Alternative streams of education have been and remain an important but difficult theme for teachers, parents, policy makers, and scholars. By focusing on case studies of six countries: Bolivia, Thailand, Australia, USA, The Netherlands, and Denmark, and by comprehensively analysing these by means of international comparative methodologies, the author approaches the nuts and bolts issues of alternative and mainstream education systems. The case studies include Charter Schools in the USA and Waldorf Schools in Australia. The study presents not only an insightful analysis of alternative forms of education with regard to actual issues in societies and also legal and administrative features of education. It provides insights into the kind of school development that could be appropriate in the 21st century and the types of educational communities we should seek to create in the age of globalisation. Posner, Chris Martin, Elsa Guzman, 2018-03-15 Over the last three decades a significant amount of research has sought to relate educational institutions policies practices and reforms to social structures and agencies A number of models have been developed that have become the basis for attempting to understand the complex relation between education and society At the same time national and international bodies tasked with improving educational performances seem to be writing in a void in that there is no rigorous theory guiding their work and their documents exhibit few references to groups institutions and forces that can impede or promote their programmes and projects As a result the recommendations these bodies provide to their clients display little to no comprehension of how and under what conditions the recommendations can be put into effect The Education System in Mexico directly addresses this problem By combining abstract insights with the practicalities of educational reforms policies practices and their social antecedents it offers a long overdue reflection of the history effects and significance of the Mexican educational system as well as presenting a more cogent understanding of the relationship between educational institutions and social forces in Mexico and around the world **Enabling Indigenous Knowledge Systems in Action Research and Action Learning** Mapotse, Tomé Awshar, Tetteh, Emmanuel N.
