Beveridge, 2014-11-27 Beveridge defined full employment as a state where there are slightly more vacant jobs than there are available workers or not more than 3% of the total workforce This book discusses how this goal might be achieved beginning with the thesis that because individual employers are not capable of creating full employment it must be the responsibility of the state Beveridge claimed that the upward pressure on wages due to the increased bargaining strength of labour would be eased by rising productivity and kept in check by a system of wage arbitration The cooperation of workers would be secured by the common interest in the ideal of full employment Alternative measures for achieving full employment included Keynesian style fiscal regulation direct control of manpower and state control of the means of production The impetus behind Beveridge's thinking was social justice and the creation of an ideal new society after the war The book was written in the context of an economy which would have to transfer from wartime direction to peace time It was then updated in 1960 following a decade where the average unemployment rate in Britain was in fact nearly 15% The Electrical Journal, 1899
