Faulder, 2024-12-30 This book presents an original study of the work of Pritzker Prize winning Portuguese architect lvaro Siza from the perspective of architecture as an interpretation of human life It combines philosophical hermeneutics narrative textual description and history and theory research to provide a rich account of Siza s work The book gives a detailed analysis of three of Siza s works from this perspective the Tidal Pool Piscina das Mar s in Le a da Palmeira Portugal the Galician Centre of Contemporary Art Centro Galego de Arte Contempor nea in Santiago de Compostela Spain and the Santa Maria Church in Marco de Canaveses Portugal This form of analysis provides insight into the unique temporal dimension of Siza s work both in the memory inscribed by the structure and in how what is inscribed is revealed by degrees to those who come into contact with it Drawing on Hans Georg Gadamer and Paul Ricoeur this book defines both building and inhabiting as acts of interpretation Through employing the technique of writing architecture as a mode of phenomenological description the book uses one form of creative configuration narrative to draw out the meaning inscribed in another form of creative configuration architecture The book contributes a unique perspective to scholarship on Siza and an in depth study to the growing field of hermeneutics of architecture It will be of interest to researchers and students of architecture and philosophy **Material Imagination in Architecture** David Dernie, Jacopo Gaspari, 2016-07-07 Material Imagination in Architecture draws on history and the visual arts and contemporary architecture to explore this popular theme in architectural practice and education In the context of a discipline increasingly driven by digital production this text explores architecture and making

and the diverse influences on the material reality of architectural form it argues that the crafts fabrication and assemblage of its making remain vital elements of contemporary architectural language This broad ranging text bridges the gap between a technical or otherwise fragmentary knowledge of materials of the specialist and the tacit or instinctive understanding of materials that the artist sculptor or architect may have It identifies key material themes pertinent to contemporary architectural debate and develops a discourse about future practice that is framed by environmental imperatives and grounded in a historical understanding of the meaning and use of materials Material iconology in architecture is a well established tradition and this book draws on that background to investigate the possibilities and limits of using materials in contemporary design to communicate the themes and contexts of an architectural project a material s relationship to context and to the history of practices that belong to the traditions of making buildings Each theme is explored in case studies from twelve countries around the world including the UK USA Spain Italy Germany Australia and China

**Open Architecture** Esra Akcan, 2018-04-09 Toward an open architecture the International Building Exhibition in Berlin *The Migrant's Time* Saloni Mathur, 2011-09-27 The conditions of alienation and exclusion are inextricably linked to the experience of the migrant This volume explores both the increasing emergence of the theme of migration as a dominant subject matter in art as well as the ways in which the varied mobilities of a globalized world have radically reshaped art s conditions of production reception and display In a selection of essays fourteen distinguished scholars explore the universality of conditions of global migration and interdependence inviting a rethinking of existing perspectives in postcolonial transnational and diaspora studies and laying the foundation for empirical and theoretical directions beyond the terms of these traditional frameworks

[The Routledge Companion to Architectural Drawings and Models](#) Federica Goffi, 2022-05-30 Architectural drawings and models are instruments of imagination communication and historical continuity The role of drawings and models and their ownership placement and authorship in a ubiquitous digital age deserve careful consideration Expanding on the well established discussion of the translation from drawings to buildings this book fills a lacuna in current scholarship questioning the significance of the lives of drawings and models after construction Including emerging well known and world renowned scholars in the fields of architectural history and theory and curatorial practices the thirty five contributions define recent research in four key areas drawing sites sites of knowledge construction drawing office construction site the afterlife of drawings and models archiving collecting displaying and exhibiting tools of making architectural representations and their apparatus over time and the ethical responsibilities of collecting and archiving authorship ownership copyrights and rights to copy The research covers a wide range of geographies and delves into the practices of such architects as Sir John Soane Superstudio Eug ne Emmanuel Viollet le Duc Frank Lloyd Wright Wajiro Kon Germ n Samper Gnecco A PS Mies van der Rohe and Renzo Piano

**Interpreting Site** Genevieve Baudoin, 2015-04-17 Interpreting Site explains the basic methods architects use to translate what you perceive to represent the complex conditions that physically and mentally construe a site

helping to shape the ultimate design Within each of the four themes defining site experiencing site spatializing site and systematizing site theoretical conceptual and analytic methods and representational tools are introduced to give you a foundation to develop your own approach to the conditions of a site Author Genevieve S Baudoin examines longstanding representation methods in relation to emerging and experimental methods offering an idiosyncratic and provocative look at different approaches Four highly illustrated full colour case studies of key contemporary projects in Spain the United States the United Kingdom and Norway demonstrate how architects have used conditions discovered on a site in their final design

Site and Composition Enis Aldallal, Husam AlWaer, Soumyen Bandyopadhyay, 2016-06-10 Site and Composition examines design strategies and tactics in site making It is concerned with the need for a renewed understanding of the site in the twenty first century and the need for a critical position regarding the continued tendency to view the site as an isolated fragment severed from its wider context The book argues revisiting the traditional instruments or means of both siting and composition in Architecture to explore their true potential in achieving connections between site and context Through the various examples studied here it is suggested that such instrumental means have the potential for achieving greater poetic outcomes The book focuses on the works of twentieth century architects of wide ranging persuasion Peter Eisenman Le Corbusier Frank Lloyd Wright Alvaro Siza Herzog and de Meuron and Charles Correa for example who have strived in quite different ways to achieve deeper engagement with the physical qualities of place and context Departing from a reconsideration of the fragment Site and Composition emphasises the role of the positive fragment in achieving both historical continuity and renewed wholeness The potential of both planimetric and sectional compositional methods are explored emphasising the importance of reciprocity between inside and outside between fragment and the whole as well as materiality Written in a clear and accessible manner this book makes vital reading for both researchers and students of architecture and urbanism

*The Architecture of Light* Mary Ann Steane, 2012-11-12 Reviewing the use of natural light by architects in the era of electricity this book aims to show that natural light not only remains a potential source of order in architecture but that natural lighting strategies impose a usefully creative discipline on design Considering an approach to environmental context that sees light as a critical aspect of place this book explores current attitudes to natural light by offering a series of in depth studies of recent projects and the particular lighting issues they have addressed It gives a more nuanced appraisal of these lighting strategies by setting them within their broader topographic climatic and cultural contexts

*The Environmental Imagination* Dean Hawkes, 2008 This volume presents a chronologically ordered and detailed account of the developing relationship between technics and poetics in environmental design in architecture through a consideration of the work of major names in the field

**Plans, Sections and Elevations** Richard Weston, 2004 CD ROM contains files for all of the plans sections and elevations included in the book

*Disclosing Horizons* Nicholas Temple, 2006-11-22 This study examines the influence of perspective on architecture highlighting how critical historical changes in the representation and perception of space continue to inform the way architects design Since its earliest developments perspective was conceived as an exemplary form of representation that served as an ideal model of how everyday existence could be measured and ultimately judged Temple argues that underlying the symbolic and epistemological meanings of perspective there prevails a deeply embedded redemptive view of the world that is deemed perfectible Temple explores this idea through a genealogical investigation of the cultural and philosophical contexts of perspective throughout history highlighting how these developments influenced architectural thought This broad historical enquiry is accompanied by a series of case studies of modern or contemporary buildings each demonstrating a particular affinity with the accompanying historical model of perspective

**The Worlds of John Wick** Caitlin G. Watt, Stephen Watt, 2022-05-10 Each John Wick film has earned more money and recognition than its predecessor defying the conventional wisdom about the box office s action movie landscape normally dominated by superhero movies and science fiction epics As *The Worlds of John Wick* explores the worldbuilding of John Wick offers thrills that you simply can t find anywhere else The franchise s plot combines familiar elements of the revenge thriller and crime film with seamlessly coordinated action One of its most distinctive appeals however is the detailed and multifaceted fictional world or rather worlds it constructs The contributors to this volume consider everything from fight sequences action aesthetics and stunts to grief cinematic space

and time and gender performance to map these worlds and explore how their range and depth make John Wick a hit A deep dive into this popular neo noir franchise The Worlds of John Wick celebrates and complicates the cult phenomenon that is John Wick

**The Oxford Dictionary of Architecture** James Stevens Curl, Susan Wilson, 2015 With over 6 000 entries this is the most authoritative dictionary of architectural history available

**Architects Today** Kester Rattenbury, Robert Bevan, Kieran Long, 2006-08-10 This volume offers both an introduction to and an insight into key contemporary architects as well as giving a snapshot of the varied nature of architecture today For each architect there are details of their life and work and illustrations of their most representative and iconic buildings

*More than Buildings* Sérgio Padrão Fernandes, João Silva Leite, Carlos Dias Coelho, 2025-02-03 More than Buildings studies the buildings typology in Portuguese cities and their relationship with the program the way in which it responds to a function the territory where it is integrated and with time and the way in which built forms evolve The book is structured around a set of key theoretical texts that highlight the potential of knowledge about typology and its specific formal characteristics in the production of new architectural objects In this sense the book has a didactic value based on the theoretical synthesis it produces which allows it to expose certain spatial and formal attributes of the typologies and thus constitute a reference for new processes of architectural production The method of analysis and decomposition of the case studies presented in each chapter provide a useful reading and interpretation key for different readers The typology should be understood as a reference in the act of designing demonstrating how to understand the elementary formal and spatial principles For the municipal authorities or other political decision makers the book will enable them to interpret the value of typology and its relevance in the production of cities This data could be useful for example in planning actions that aim at preserving or converting urban areas of architectural value The book will be relevant to readers within an academic framework and in the professional field engaged in work around architecture cities planning and conservation

**Architectural and Urban Subsymmetries** Jin-Ho Park, 2022-09-24 This book focuses on symmetries in the analysis and synthesis of architectural designs Crucial in the history of architecture principles of symmetry provided the means to achieve balance and harmony of spatial composition in architecture Less well known is the importance of symmetry principles in the analysis of the distinct constituents in a contemporary architectural design which may at first glance appear disorganized or even random The revelation of different hierarchical levels wherein various types of symmetry or subsymmetry are superimposed provides a key for deciphering the underlying structure of spatial logic The interaction between local and global subsymmetries is of particular interest Operating with symmetry concepts in this manner offers architects designers and students an explicit method for understanding the symmetrical logics of sophisticated designs and gaining insights into new designs This book has two complementary objectives to explore the fundamental principles of architectural composition founded on the algebraic structure of symmetry groups in mathematics and to apply the principles in the analysis and synthesis of architectural and

urban designs By viewing and decomposing architectural and urban designs in this manner the hidden spatial logic and underlying order in a design become transparent
