Business Structures David G. Epstein, 2007 A popular and highly adaptable casebook for use in either a three credit or four credit course on business organizations or corporations The second edition continues the traits that made the original so popular The book is intended for all law students whether they will practice on Wall Street or Main Street It is aimed not only at those who were finance majors and know that they will take advanced corporate courses It s also for the poetry majors who assume that they are going to dislike the course Students who use the book are often shocked at how much they enjoy the subject and class The book best meets law students need to understand not only the legal issues that arise in battling for control of a large mature public corporation but also the legal and business issues that arise in starting and growing a new business The book is student friendly it speaks to the student and conveys much meaningful information much like a text book in other fields It features

problems and questions that integrate and develop doctrine Unlike many other casebooks that merely cobble together a series of cases and open ended questions the book carefully teaches in an enjoyable but organized way During class the professor can focus on the fun material the book has already taught students the nuts and bolts The book has a unique structure as students follow a business Bubba s Burritos through every phase of each of the business structures The course builds with the same cast of characters as they explore how to form a business how to make it grow how to raise capital how to transfer ownership how to assess liability issues and how the business may come to an end This same business life cycle is experienced for the sole proprietorship general partnership close corporation public corporation limited partnership and LLC Students will compare and contrast the advantages and disadvantages of each business structure The book draws on special resources The contributions of Mike Roberts of the Harvard Business School are especially obvious Students benefit from B School materials excerpts from periodicals problems and lots of original text to focus on both business and legal issues Likewise new co author George Shepherd a legal scholar and economist offers economic theory made easy he translates important economic concepts into simple language that all can enjoy And it s SHORT It provides a comprehensive view of business organizations in fewer than 850 pages including some light hearted and light headed efforts at humor We don t force the professor to spend hours trying to determine what parts of a bloated book are important enough to assign We have done the distilling for you The book features the innovation of asking questions before most cases as well as after to focus the students reading The combination of cases is compelling the old classics plus new teaching vehicles that will become classics In addition the second edition features up to the minute discussion of new developments such as CEO compensation and Sarbanes Oxley These materials can be adapted to almost any need For those desiring full coverage of publicly traded corporations no problem as the book treats Section 16b proxy fights and takeovers Those desiring to leave those materials out will find plenty for a full three or four credit course on the variety of business structures
