Revenue Sources of Local Governments J. Edwin Benton, 2024-04-11. With limited fiscal capabilities, effective and efficient budgeting is a necessity for local governments in the United States. Acknowledging the critical but often overlooked part that raising enough revenue to fund desirable and mandatory programs plays in the budgetary process, this book offers an exclusive and comprehensive examination of the revenue side of the budget. It provides much-needed and wide-ranging context for examining and understanding local government revenues and local government revenue policy. Author J. Edwin Benton presents a comprehensive overview of the revenue structure for local governments in general and for counties, municipalities, townships, special districts, and school districts in particular. The bulk of this book meticulously examines the historical patterns and trends in revenue usage by local governments and provides explanations for variations among different units of government, states, and regions of the country. This book enhances our understanding of the most relevant research and aids in refining theories that seek to explain why local governments or different types of local governments rely more on certain kinds of revenues. It also offers immediately applicable real-world case studies on revenue-raising capabilities, practicalities, and experiences of local governments around the country. It will be of enormous interest to public budgeting practitioners, students, and scholars.

Keir Nash, 1972. *Sustainable Food Security in the Era of Local and Global Environmental Change* Mohamed Behnassi, Olaf Pollmann, Gabrielle Kissinger, 2013-07-01. This volume discusses a broad range of vital issues encompassing the production and consumption of food in the current period of climate change. All of these add up to looming momentous challenges to food security, especially for people in regions where malnutrition and famine have been the norm during numerous decades. Furthermore, threats to food security do not stop at the borders of more affluent countries; governance of food systems and changes in eating patterns will have worldwide consequences. The book is arranged in four broad sections. Part I, Combating Food Insecurity, opens with a chapter describing the urgent necessity for a new paradigm and policy set to meet the food security challenges of

climate change Also in this section are chapters on meat and the dimensions of animal welfare climate change and sustainability on dietary options for mitigating climate change and the linkage of forest and food production in the context of the REDD approach to valuation of forests Part II Managing Linkages Between Climate Change and Food Security offers a South Asian perspective on Gender Climate Change and Household Food Security a chapter on food crisis in sub Saharan Africa and separate chapters on critical issues of food supply and production in Nigeria far Western Nepal and the Sudano Sahelian zone of Cameroon Part III examines Food Security and patterns of production and consumption with chapters focused on Morocco Thailand Bahrain Kenya and elsewhere The final section discusses successful innovative practices with chapters on Food Security in Knowledge Based Economy Biosaline Agriculture in the Gulf States Rice production in a cotton zone of Benin palm oil in the production of biofuel and experiments in raised bed wheat production The editors argue that technical prescriptions are insufficient to manage the food security challenge They propose and explain a holistic approach for adapting food systems to global environmental change which demands the engagement of many disciplines a new sustainable food security paradigm

Rethinking Resilience, Adaptation and Transformation in a Time of Change Wanglin Yan, Will Galloway, 2017-03-21 This book contributes to the literature on resilience hazard planning risk management environmental policy and design presenting articles that focus on building resilience through social and technical means Bringing together contributions from Japanese authors the book also offers a rare English language glimpse into current policy and practice in Japan since the 2011 Tohoku disaster The growth of resilience as a common point of contact for fields as disparate as economics architecture and population politics reflects a shared concern about our capacity to cope with and adapt to change The ability to bounce back from hardship and disaster is essential to all of our futures Yet if such ability is to be sustainable and not rely on a brute force response innovation will need to become a core practice for policymakers and on the ground responders alike The book offers a valuable reference guide for graduate students researchers and policy analysts who are looking for a holistic but practical
