

Linear Algebra and Probability: Fundamentals of Linear Algebra

Explore the fundamentals of linear algebra, including characteristics and its role in machine learning, in this 13-video course. Learners can examine important concepts associated with linear algebra, such as the class of spaces, types of vector space, vector norms, linear product vector and theorems, and various operations that can be performed on matrix. Key concepts examined in this course include important classes of spaces associated with linear algebra; features of vector spaces and the different types of vector spaces and their application in distribution and Fourier analysis; and inner product spaces and the various theorems that are applied on inner product spaces. Next, you will learn how to implement vector arithmetic by using Python; learn how to implement vector scalar multiplication with Python; and learn the concept and different types of vector norms. Finally, learn how to implement matrix-matrix multiplication, matrix-vector multiplication, and matrix-scalar multiplication by using Python; and learn about matrix decomposition and the roles of Eigenvectors and Eigenvalues in machine learning.

Hi, my name is Satyendra Maurya, and I'm part of Alchemy Software Solutions E-Learning and Training Content Development team. I have over a decade of experience providing e-learning solutions.

[Video description begins] *Your host for the session is Satyendra Maurya. He is an E-Learning Content Development Specialist.* [Video description ends]

During my career, I have worked as a lead business analyst, application developer specialist, and project manager. I specialize in application development, machine learning, database solutions, big data solutions, cloud solutions, DevOps, visualization, and project management. My certifications include PMP and AHM 250.

Linear algebra is branch of mathematics that deals with vectors, matrices and the functions that can be performed on these mathematical objects. The concepts of linear algebra are key to the theories behind machine learning, and especially in the area of deep learning algorithms.

In this course, I will explore the fundamentals of linear algebra, the characteristics of this branch of mathematics and the role it plays with machine learning. I will discuss important concepts such as the class of spaces, type of vector space, vector norms, linear product vector and theorems, and the various operations that can be performed on matrices. I will also demonstrate how to implement vector arithmetic, vector scalar multiplication and matrix arithmetic using Python.
