Covenant To Care:

Cura Animarum Ioan C. Veres, 2025-04-25 As artificial intelligence advances healthcare faces a profound ethical question Can machines truly care This book critically examines the rise of AI driven social robots carebots in patient care evaluating their benefits and potential harms through the lens of Christian ethics While AI may enhance efficiency and offer support in specific healthcare contexts it also risks dehumanizing care replacing genuine human presence with technological substitutes Grounded in a theology of covenant care this work builds its ethical argument around the biblical parable of the Good Samaritan emphasizing the irreplaceable nature of human compassion It presents theological and ethical criteria to guide the responsible use of AI in healthcare ensuring that technology serves rather than supplants the dignity of human relationships This book is essential reading for theologians ethicists healthcare professionals and AI developers navigating the intersection of faith ethics and emerging technology As healthcare increasingly integrates AI Cura Animarum challenges readers to consider where technology supports human dignity and where it threatens to erode the essence of genuine care Is AI merely a tool or does it risk redefining what it means to care
