Education for Sustainability Paul Clarke,2013-06-17 In this book Paul Clarke argues that in order to live sustainably we need to learn how to live and flourish in our environment in a manner that uses finite resources with ecologically informed discretion Education is perfectly placed to create the conditions for innovative and imaginative solutions and to provide the formulas that ensure that everyone becomes naturally smart but to achieve this we need to recognise that an education that is not grounded in a full understanding of our relationship with the natural world is no education at all In other words a total transformation of schools and schooling is needed While acknowledging that the ecological crisis is global in scale Paul Clarke maintains that many of the solutions are already evident in our local communities Drawing on innovative sustainable living programmes from around the world including Sweden s Forest Schools China s Green Schools programme the US Green Ribbon Schools programme and his own school of sustainability project Paul Clarke offers practical solutions about how schools and communities can make their contribution This book examines how we might proceed to empower and actively develop schools and communities to connect hand heart and mind for an eco literate future It is thought provoking timely and challenging and should be read by school leaders community and business leaders as well as anyone grappling with the problems of transition from an industrial past to an ecologically sustainable future

Decentralized Economic Social Organization Reed Camacho Kinney, 2012-04-02 Representational government is not authentic democracy The American Constitution cannot defend us from socioeconomic domination by centralized power Independence means that people organize among themselves in order to meet all of their existential needs which include more than preserving corporal survival It means actualizing a better civil and civic organization and adding to that a civic economic organization explained in my other writings in order to afford every child the support needed to grow as individuated people The genius my father contributed is the means of making consensus based decision making processes a structured organization in

conjunction with mutual banking and its production based economy which as an organization must expand or perish That inbuilt expansive component is what distinguishes DESO from all other attempts to create a better lifestyle By forcing decentralization to expand as a structural component consequent of consensus based organization and its mutual banking and its production based economy it will compete with mass centrist society for members because living in real sovereign community provides a better quality of life a better culture I am encouraged that there are people really interested in making this project move into its actualization and that eventuality is nearing My blog <http://decentralizationblog.wordpress.com>
