Seismic Wave Propagation in Non-Homogeneous Elastic Media by Boundary Elements George D. Manolis, Petia S. Dineva, Tsviatko V. Rangelov, Frank Wuttke, 2016-09-23 This book focuses on the mathematical potential and computational efficiency of the Boundary Element Method BEM for modeling seismic wave propagation in either continuous or discrete inhomogeneous elastic viscoelastic isotropic anisotropic media containing multiple cavities cracks inclusions and surface topography BEM models may take into account the entire seismic wave path from the seismic source through the geological deposits all the way up to the local site under consideration The general presentation of the theoretical basis of elastodynamics for inhomogeneous and heterogeneous continua in the first part is followed by the analytical derivation of

fundamental solutions and Green's functions for the governing field equations by the usage of Fourier and Radon transforms. The numerical implementation of the BEM is for antiplane in the second part as well as for plane strain boundary value problems in the third part. Verification studies and parametric analysis appear throughout the book as do both recent references and seminal ones from the past. Since the background of the authors is in solid mechanics and mathematical physics, the presented BEM formulations are valid for many areas such as civil engineering, geophysics, material science and all others concerning elastic wave propagation through inhomogeneous and heterogeneous media. The material presented in this book is suitable for self study. The book is written at a level suitable for advanced undergraduates or beginning graduate students in solid mechanics, computational mechanics and fracture mechanics.

Where Are All the Young Men and Women of Color? Melvin Delgado, 2001-09-26. When it comes to social work practice in community outreach programs in juvenile detention centres, in prisons, in parole and probation programs and in the inner cities, Melvin Delgado asks the question: Where are all the young men and women of color? Although many urban residents, especially persons of color, are or have been involved in the juvenile and/or criminal justice system, the topic of criminal offenders and ex-offenders has been much neglected by the human services literature. This book stands as the only work to discuss correctional supervision and the needs of individuals in a nonprescriptive manner, marking a shift toward a capacity enhancement or strengths perspective approach. Specifically, what are the strengths of individuals and how can they capitalize on them? Delgado includes a section of reflections from the field that applies capacity enhancement principles and methods to case studies.
