Musick,2007-07-24 Explores the world s oceans **Blue Planet, Blue God** Meric Srokosz,Rebecca S. Watson,2017-11-30 The ocean dominates the surface of the earth and is in the pages of the Bible too The Bible offers a view of the sea and the life it supports which affirms its intrinsic value to God as a good and indeed essential part of creation At the same time it also speaks perceptively of the sea s vulnerability to damage and change The Bible s focus on the sea raises questions about economics and the interconnectedness of communities whilst further references to the sea raise questions about our human centredness and spirituality and about our fear of chaos and disaster In a unique collaborative project the oceanographer Meric Srokosz and the biblical scholar Rebecca Watson not only offer environmental insights on the sea but also connect the ocean with other key issues of broader concern spirituality economics chaos and our place in the world Each chapter concludes with ideas for discussion and reflection and for suggested actions in the light of the issues raised The book will present a fresh new lens through which to view the Bible and as such inform biblical scholars students and preachers alike

International Union for Conservation of Natural Resources IUCN and the Intergovernmental Oceanic Commission IOC of UNESCO is collaborating with governments research institutions non governmental and international organizations and communities around the world to develop management approaches financial incentives and policy mechanisms for ensuring conservation and restoration of blue carbon ecosystems and implement projects around the world that demonstrate the feasibility of blue carbon accounting management and incentive agreements The present book has critically presented the data bank for each community of blue carbon not merely in the form of text description but also through case studies that are the outcomes of research projects and pilot programmes

The Blue Planet Brian J. Skinner, Stephen C. Porter, 1995 A unique introduction to the holistic view of the Earth Stresses the systems approach showing the energy flows and links between the Earth s different parts the atmosphere hydrosphere biosphere and the solid Earth and the balance in the global environment that exists as a result of these interactions Every chapter opens with a topical essay dealing with research on the subject matter and closes with a guest essay written by a researcher in the field Special attention has been paid to select full color artwork and photographs which illuminate discussions

Evolution: the Grand Experiment Dr. Carl Werner, Carl Werner, 2007 Darwin s book on evolution admitted that intermediate links were perhaps the most obvious and serious objection to the theory of evolution Darwin recognized that the fossils collected by scientists prior to 1859 did not correspond with his theory of evolution but he predicted that his theory would be confirmed as more and more fossils were found One hundred and fifty years later Evolution The Grand Experiment critically examines the viability of Darwin s theory

Ocean Survival Susie Hodge, 2008-11-07 Enter an exciting world of extremes The Extreme Habitats series focuses on four of Earths most challenging environments Readers can explore some of the most fascinating habitats on the planet Did you know that oceans cover more of Earth than land does How do creatures survive in this underwater world Ocean Survival explains how to stay out

Extreme Habitats: Ocean Survival (EasyRead Super Large 18pt Edition) , **Marine Ecotourism** Carl Cater, Erlet Cater, 2007 Covering economic marketing planning and regulation issues this book also considers the vital role of marine ecotourism in raising awareness of the significance of the seas and oceans to sustainable coastal livelihoods

Earth Frank H. T. Rhodes, 2012-06-10 It s impossible to grasp the whole planet or integrate all the descriptions of it But because we live here we have to try This is not just an artistic compulsion or an existential yearning still less an academic exercise It s a survival issue This is the only planet we have We re stuck here and we don t own the place it would be the height of arrogance to assume that we do We re tenants here not owners but we re tenants with hope for a long term tenancy We want to extend our lease just as far as we can from Earth A Tenant s Manual In Earth A Tenant s Manual the distinguished geologist Frank H T Rhodes President Emeritus of Cornell University provides a sweeping accessible and deeply informed guide to the home we all share showing us how we might best preserve the Earth s livability for ourselves and future generations Rhodes begins by setting the scene for our active planet and explaining how its location and

composition determine how the Earth works and why it teems with life He emphasizes the changes that are of concern to us today from earthquakes to climate change and the clashes over the energy resources needed for the Earth's exploding population He concludes with an extended exploration of humanity's prospects on a complex protean and ultimately finite world It is not a question of whether the planet is sustainable the challenge facing life on Earth and the life of the Earth is whether an expanding and high consumption species like ours is sustainable Only new resources new priorities new policies and most of all new knowledge can reverse the damage that humanity is doing to our home and ourselves A sustainable human future Rhodes concludes in this eloquent sobering but ultimately optimistic book will require a sense of responsible stewardship for we are not owners of this planet we are tenants Surveying the systems large and small that govern Earth's processes and influence its changes Rhodes addresses the negative consequences of human activities for the health of its regulatory systems but offers practical suggestions as to how we might effect repairs or at least limit further damage to our home

The Underwater Eye Margaret Cohen, 2022-04-12 In *The Underwater Eye* Margaret Cohen tells the fascinating story of how the development of modern diving equipment and movie camera technology has allowed documentary and narrative filmmakers to take human vision into the depths creating new imagery of the seas and the underwater realm and expanding the scope of popular imagination Innovating on the most challenging film set on earth filmmakers have tapped the emotional power of the underwater environment to forge new visions of horror tragedy adventure beauty and surrealism entertaining the public and shaping its perception of ocean reality Examining works by filmmakers ranging from J E Williamson inventor of the first undersea film technology in 1914 to Wes Anderson who filmed the underwater scenes of his 2004 *The Life Aquatic with Steve Zissou* entirely in a pool *The Underwater Eye* traces how the radically alien qualities of underwater optics have shaped liquid fantasies for more than a century Richly illustrated the book explores documentaries by Jacques Cousteau Louis Malle and Hans Hass art films by Man Ray and Jean Vigo and popular movies and television shows such as *20 000 Leagues Under the Sea* *Creature from the Black Lagoon* *Sea Hunt* the Bond films *Jaws* *The Abyss* and *Titanic* In exploring the cultural impact of underwater filmmaking the book also asks compelling questions about the role film plays in engaging the public with the remote ocean a frontline of climate change

Darwin's Psychology Ben Bradley, 2020 This is the first book ever to examine the riches of what Darwin himself wrote about psychological matters It unearths a Darwin new to science whose first concern is the agency of organisms from which he derives both his psychology and his theory of evolution

Oceans and Society Ana Spalding, Daniel Suman, 2023-02-28 This unique textbook presents an introduction to the interdisciplinary field of marine studies exploring the dynamic relationship between people and the marine environment Emphasizing the human dimension of coastal and ocean issues the book provides an innovative examination of the complex marine human environment dynamics by drawing on social science and humanities approaches Applying these interdisciplinary approaches the textbook addresses key challenges facing the marine environment including changing

climate fisheries aquaculture marine pollution energy production and management of areas beyond national jurisdiction While leading with a human dimension approach to these challenges the chapters are all firmly grounded in foundational knowledge about coastal and ocean environments and processes The textbook also includes examples of professional or academic areas of specialization within marine studies such as social and environmental justice governance global perspectives traditional ecological knowledge and management entrepreneurship community development conservation and the blue economy Ultimately the book provides the first cohesive resource on marine studies to educate students train interdisciplinary marine leaders inspire new knowledge about people and the sea generate innovative solutions for sustainable oceans and build capacity for a new generation of marine focused professionals Oceans and Society is essential reading for students on marine studies courses as well as those studying marine governance policy conservation and law more broadly It will also be of great interest to students researchers and professionals interested in applying interdisciplinary approaches to environmental challenges
