Allied Landing Craft Of World War Two:

Allied Landing Craft of World War Two, 1985 *USS LCI - Landing Craft Infantry Vol II*, 1995-06-15 World War II in Europe David T. Zabecki, 2015-05-01 World War II defined the 20th century and shaped many events from the decolonization of Africa to the rise and fall of the Berlin Wall This encyclopedia offers a focused overview of this complex and volatile era the circumstances that led up to war the underlying causes its unfolding and consequences Organized for quick and precise access More than 1300 entries by 150 experts are arranged in six sections for easy reference and consultation All the key ideas events actions weapons individuals and organizations that played vital roles in the war are covered from the Axis Pact to the Arab League from the OSS to the Africa Korps from the Chetniks to the Jedburghs from the battle of Kursk to Operation Mincemeat from Bill Donovan to Otto Skorzeny from Gestapo to SMERSH from Georgi Zhukov to Jean Leclerc from the 88 gun to the Norden Bombsight Covers important neglected subjects The Encyclopedia puts special emphasis on the often neglected operations in Eastern Europe and Russia A key section inspects and rates all the major weapons with handy tables for easy comparison And in recognition of the first large scale participation of women in the war the volume thoroughly documents their individual and unit contributions to the Allied effort Finally the encyclopedia discusses battlefield realities that explain for example why the airborne drops at Normandy succeeded and the ones at Arnheim failed A bibliography glossary maps photographs and weapons and data tables enhance the coverage Also includes 16 maps

American Amphibious Gunboats in World War II Robin L. Rielly, 2013-05-04 As the United States began its campaign against numerous Japanese held islands in the Pacific Japanese tactics required them to develop new weapons and strategies One of the most crucial to the island assaults was a new group of amphibious gunboats that could deliver heavy fire close in to shore as American forces landed These gunboats were also to prove important in the interdiction of inter island barge traffic and late in the war the kamikaze threat Several variations of these gunboats were developed based on the troop carrying LCI L They included three conversions of the LCI L with various combinations of guns rockets and mortars and a fourth gunboat the LCS L based on the same hull but designed as a weapons platform from the beginning By the end of the war the amphibious gunboats had proven their worth *D-Day Landing Craft* Andrew Whitmarsh, 2024-05-23 This is a marvellous book The research is very thorough and it will answer all my questions RICHARD WILLIS Normandy veteran first lieutenant on LCT 898 on D Day Brings to life the planning and execution of the largest amphibious landing which the world has ever seen My grandfather would have been most impressed by this detailed research CAPTAIN WILL RAMSAY grandson of Admiral Sir Bertram Ramsay Allied Naval Commander Expeditionary Force D Day one of the most decisive moments of the Second World War could not have happened without thousands of landing craft Yet their role and that of their crews has often been overlooked During a combined operation that involved aerial and naval assaults as well as amphibious landings on a vast scale more than 132 000 Allied troops landed on the Normandy beaches on 6 June 1944 Through their efforts the tide

of the war turned for the final time to favour the Allies There is no overstating the contribution of the landing craft and their crews on the first day of Operation Neptune and yet it is often overlooked In D Day Landing Craft historian Andrew Whitmarsh turns his attention to these vital vessels that ensured the operation s success He describes events on each of the five Allied beaches on D Day from the perspective of landing craft landing ships and their crews He examines why there were so many different types of landing craft and how they were built over several years in both the UK and North America despite many competing war production requirements and operational demands This closely researched and well illustrated account is essential to anyone who wants to fully understand the course of D Day and the nature of Allied preparations for the campaign

The U.S. Navy's "Interim" LSM(R)s in World War II Ron MacKay, Jr.,2016-04-26 The Interim LSM R or Landing Ship Medium Rocket was a revolutionary development in rocket warfare in World War II and the U S Navy s first true rocket ship An entirely new class of commissioned warship and the forerunners of today s missile firing naval combatants these ships began as improvised conversions of conventional amphibious landing craft in South Carolina s Charleston Navy Yard during late 1944 They were rushed to the Pacific Theatre to support the U S Army and Marines with heavy rocket bombardments that devastated Japanese forces on Okinawa in 1945 Their primary mission was to deliver maximum firepower to enemy targets ashore Yet LSM R s also repulsed explosive Japanese speed boats

rescued crippled warships recovered hundreds of survivors at sea and were deployed as antisubmarine hunter killers Casualties were staggering enemy gunfire blasted one while kamikaze attacks sank three crippled a fourth and grazed two more This book provides a comprehensive operational history of the Navy's 12 original Interim LSM(R)s

Global Logistics and Strategy Richard M. Leighton, Robert W. Coakley, 1968 The Oxford Illustrated History of World War Two Richard Overy, 2015-04-09 World War Two was the most devastating conflict in recorded human history It was both global in extent and total in character It has understandably left a long and dark shadow across the decades Yet it is three generations since hostilities formally ended in 1945 and the conflict is now a lived memory for only a few And this growing distance in time has allowed historians to think differently about how to describe it how to explain its course and what subjects to focus on when considering the wartime experience For instance as World War Two recedes ever further into the past even a question as apparently basic as when it began and ended becomes less certain Was it 1939 when the war in Europe began Or the summer of 1941 with the beginning of Hitler's war against the Soviet Union Or did it become truly global only when the Japanese brought the USA into the war at the end of 1941 And what of the long conflict in East Asia beginning with the Japanese aggression in China in the early 1930s and only ending with the triumph of the Chinese Communists in 1949 In The Oxford Illustrated History of World War Two a team of leading historians reassesses the conflict for a new generation exploring the course of the war not just in terms of the Allied response but also from the viewpoint of the Axis aggressor states Under Richard Overy's expert editorial guidance the contributions take us from the genesis of war through the action in the major theatres of conflict by land sea and air to assessments of fighting power and military and technical innovation the economics of total war the culture and propaganda of war and the experience of war and genocide for both combatants and civilians concluding with an account of the transition from World War to Cold War in the late 1940s Together they provide a stimulating and thought provoking new interpretation of one of the most terrible and fascinating episodes in world history

Global Logistics and Strategy Richard M. Leighton, Robert W. Coakley, 1955 Military Innovation in the Interwar Period Williamson R. Murray, Allan R. Millett, 1998-08-13 In 1914 the armies and navies that faced each other were alike right down to the strengths of their companies and battalions and the designs of their battleships and cruisers Differences were of degree rather than essence During the interwar period however the armed forces grew increasingly asymmetrical developing different approaches to the same problems This study of major military innovations in the 1920s and 1930s explores differences in exploitation by the seven major military powers The comparative essays investigate how and why innovation occurred or did not occur and explain much of the strategic and operative performance of the Axis and Allies in World War II The essays focus on several instances of how military services developed new technology and weapons and incorporated them into their doctrine organization and styles of operations

Kamikazes, Corsairs, and Picket Ships Robin L. Rielly, 2020-01-10 The untold story of ferocious air and naval combat during the WWII Battle of Okinawa drawn from primary sources and survivor interviews This is the story of an overlooked yet significant aerial and naval battle during the American assault on Okinawa in the spring of 1945 While losses to America's main fleet are well recorded less well known is the terrific battle waged on the radar picket line the fleet's outer defense against Japanese marauders Weaving together the experiences of the ships and their crews drawn from ship and aircraft action reports ship logs and personal interviews historian Robin L. Rielly recounts one of the most ferocious air and naval battles in history The US fleet and its accompanying airpower was so massive that the Japanese could only rely on suicide attacks to inflict critical damage Of the 206 ships that served on radar picket duty twenty nine percent were sunk or damaged by Japanese air attacks making theirs the most hazardous naval surface duty in World War II The great losses were largely due to relentless kamikaze attacks but also resulted from the improper use of support gunboats failure to establish land based radar at the earliest possible time the assignment of ships ill equipped for picket duty and as time went on crew fatigue US air cover during the battle is also described in full as squadrons dashed from their carriers and land bases to intercept the Japanese swarms resulting in constant melees over the fleet *Landing Craft, Infantry and Fire Support* Gordon L. Rottman, 2011-03-15 Described by one soldier as a metal box designed by a sadist to move soldiers across the water the Landing Craft Infantry was a large beaching craft intended to deliver an infantry company to a hostile shore once the beachhead was secured The LCI and its vehicle delivery counterpart the Landing Ship Medium were widely used by the allies during World War II Later the hulls of these ships were used as the basis for a fire support ship While the landing ships were phased out after the Korean War some fire support craft remained in use throughout the Vietnam War This book tells the developmental and operational history of this important tool of American amphibious military strategy that spanned three wars *Nelson to Vanguard* D K Brown, 2023-06-30 The third volume in D K Brown's bestselling series on warship design and development looks at the Royal Navy's response to the restrictions placed on it by the Washington Naval Treaties in the inter war years and analyses the fleet that was constructed to fight the Second World War He focusses on the principal

pre war developments such as the first purpose built aircraft carriers and the growing perception of the threat of air attack to warships All the wartime construction programs are covered such as the massive expansion in escort ships to counter the U boat menace and the development of the amphibious warfare fleet for the D Day landings in 1944 Full analysis is also provided of the experience of wartime damage as well as the once top secret pre and post war damage trials Illustrated throughout with a superb collection of contemporary photographs and numerous line drawings this now classic work is required reading for naval historians and enthusiasts Yet another tour de force Highly recommended Warship World This is a truly magnificent effort both in content and presentation Warship The Real History of World War II Alan Axelrod,2008 Traces the causes of World War II explores the motivations of important people involved with it presents the events of the war grouped by the theater in which they took place and examines its aftermath *Landing Ship, Tank (LST) 1942-2002* Gordon L. Rottman,2012-09-20 The Landing Ship Tank LST is one of the most famous of the many World War II amphibious warfare ships Capable of discharging its cargo directly on to shore and extracting itself the LST provided the backbone of all Allied landings between 1943 and 1945 notably during the D Day invasion Through its history the LST saw service from late 1942 until late 2002 when the US Navy decommissioned the USS Frederick LST 1184 the last ship of its type This book reveals the development and use of the LST including its excellence beyond its initial design expectations
