inquiries on Classical Arabic and the Classical tradition and spoken Arabic dialects with historical studies embedded within the broader field of Semitic languages This situation is changing quickly not only through the continuation of older research traditions but also with the integration of new research fields and perspectives With this expansion comes the danger of specialists in Arabic losing an overview of the field and of leaving non specialists without basic resources for evaluating domains of research which they may be interested in for comparative purposes The Oxford Handbook of Arabic Linguistics will confront this problem by combining state of the art overviews with essays on issues of perspective controversy and point of view In twenty four chapters leading experts from around the world will lay out their own stances on controversial issues The book not only evaluates ways in which questions and theories established in general linguistics and its sub fields elucidate Arabic but also challenges approaches which might result in accommodating Arabic to non Arabic interpretations and brings out the Arabic specificity of individual problems The Handbook in one compact volume gives critical expression to a language which covers large populations and geographical areas has a long written tradition and has been the locus of major intellectual fervor and debate

Carrying on the Tradition: A Social and Intellectual History of Hadith Transmission across a Thousand Years Garrett Davidson, 2020-07-20 In *Carrying on the Tradition* Garrett Davidson employs a variety of largely unutilized print as well as archival sources collected from the Near East North Africa India Europe and North America He analyses these sources to excavate the fundamental reinvention of the conceptions and practices of hadith transmission that resulted from the establishment of the hadith canon Further the book examines how hadith scholars reimagined the transmission of hadith not as a scholarly tool as it had originally been but instead as among other things an act of pious emulation of the forefathers It demonstrates the emergence of new genres and subgenres of hadith literature as a result of this shift examining them as artefacts of the cultural social and intellectual history of Muslim religiosity from the tenth to twentieth centuries
