than 50 000 years ago mankind had no art no religion no sophisticated symbolism no innovative thinking Then in a dramatic and electrifying change described by scientists as the greatest riddle in human history all the skills and qualities that we value most highly in ourselves appeared already fully formed as though bestowed on us by hidden powers Graham Hancock sets out to investigate this mysterious before and after moment and to discover the truth about the influences that gave birth to the modern human mind His quest takes him on a journey of adventure from the stunningly beautiful painted caves of prehistoric France Spain and Italy to remote rock shelters in the mountains of South Africa where he finds a treasure trove of extraordinary Stone Age art ending in the depths of the Amazon rainforest where he drinks the powerful plant hallucinogen Ayahuasca with Indian shamans whose paintings contain images of supernatural beings identical to the animal human hybrids depicted in prehistoric caves and rock shelters Could these supernaturals be the ancient teachers of mankind And is human evolution in fact more purposeful and intelligent that we have barely even begun to understand

González Gonzales Morales, 2012-04-16 Though known as a site since 1903 El Mirón Cave in the Cantabrian Mountains of northern Spain remained unexcavated until a team from the universities of New Mexico and Cantabria began ongoing excavations in 1996 This large deeply stratified cave allowed the team to apply cutting edge techniques of excavation recording and multidisciplinary analysis in the meticulous study of a site that has become a new reference sequence for the classic Cantabrian region The excavations uncovered the long history of human occupation of the cave extending from the end of the Middle Paleolithic through the Upper Paleolithic up to the modern era This volume comprehensively describes the background information on the setting the site the chronology and the sedimentology It then focuses on the biological and archaeological records of the Holocene levels pertaining to Mesolithic Neolithic Chalcolithic and Bronze Age Archaeologists anthropologists and historians will be drawn to this study and its extensive findings dated by some seventy five radiocarbon assays

Palaeoart of the Ice Age Robert G. Bednarik, 2017-08-21 The many hundreds of books and thousands of academic papers on the topic of Pleistocene

Ice Age art are limited in their approach because they deal only with the early art of southwestern Europe This is the first book to offer a comprehensive synthesis of the known Pleistocene palaeoart of six continents a phenomenon that is in fact more numerous and older in other continents It contemplates the origins of art in a balanced manner based on reality rather than fantasies about cultural primacy Its key findings challenge most previous perceptions in this field and literally re write the discipline Despite the eclectic format and its high academic standards the book addresses the non specialist as well as the specialist reader It presents a panorama of the rich history of palaeoart stretching back more than twenty times as long in time as the cave art of France and Spain This abundance of evidence is harnessed in presenting a new hypothesis of how early humans began to form and express constructs of reality and thus created the ideational world in which they existed It explains how art producing behaviour began and the origins of how humans relate to the world consciously
