Cooper,Hany Besada,2016-04-15 Today s era of intense globalization has unleashed dynamic movements of people pathogens and pests that overwhelm the static territorial jurisdictions on which the governance provided by sovereign states and their formal intergovernmental institutions is based This world of movement calls for new ideas and institutions to govern people s health above all in Africa where the movements and health challenges are the most acute This book insightfully explores these challenges in ways that put the perspectives of Africans themselves at centre stage It begins with the long central and still compelling African health challenge of combating the pandemic of HIV AIDS It then examines the global governance responses by the major multilateral organizations of the World Bank and the World Trade Organization and the newer informal flexible democratically oriented ones of the Group of Eight It also addresses the compounding health challenge created by climate change to assess both its intensifying impact on Africa and how all international institutions have largely failed to link climate and health in their governance response It concludes with several recommendations about the

innovative ideas and institutions that offer a way to closing the great global governance gaps and thus improving Africans health and that of citizens beyond

AIDS and Rural Livelihoods Anke Niehof,Gabriel Rugalema,2019-01-15 AIDS epidemics continue to threaten the livelihoods of millions of people in sub Saharan Africa Three decades after the disease was first recognized the annual death toll from AIDS exceeds that from wars famine and floods combined Yet despite millions of dollars of aid and research there has previously been little detailed on the ground analysis of the multifaceted impacts on rural people Filling that gap this book brings together recent evidence of AIDS impacts on rural households livelihoods and agricultural practice in sub Saharan Africa There is particular emphasis on the role of women in affected households and on the situation of children The book is unique in presenting micro level information collected by original empirical research in a range of African countries and showing how well grounded conclusions on trends impacts and local responses can be applied to the design of HIV responsive policies and programmes AIDS impacts are more diverse than we previously thought and local responses more varied sometimes innovative sometimes desperate The book represents a major contribution to our understanding of the impacts of AIDS in the epidemic s heartland and how these can be managed at different levels
