Conduction Aphasia Susan E. Kohn,2013-06-17 Over the past decade questions about the clinical classification and experimental examination of aphasic patients have been raised Growing doubts about the validity and reliability of standard clinical diagnoses have been responsible in part for the explosion of case studies in the neurolinguistic literature In turn rejection of classical aphasia diagnoses has made it difficult to synthesize much of this literature and no alternative method for selecting and comparing aphasic patients has emerged This volume was motivated by a desire to take a fresh look at the benefits that aphasia diagnosis has for both clinical and experimental work This is accomplished by exploring one classical aphasia syndrome from a multidisciplinary perspective that is by presenting information from the disciplines of neurology speech language pathology and experimental neurolinguistics Given this scope it is hoped that this work will appeal to an equally broad range of readers
