Alliances And International Order:

Alliances and Power Politics in the Trump Era Maud Quessard, Frédéric Heurtebize, Frédérick Gagnon, 2020-03-02 This volume examines the evolution of US foreign policy since Donald Trump's accession to the presidency and the strategic challenges confronting the United States in a changing geopolitical environment Trump has delivered on his promises to break with past policies and this has for the most part revealed a policy of retrenchment that has jeopardized US alliances The book focuses on the current state and future of transatlantic relations on Washington's policy in the Middle East and Africa on the administration's use of the economic weapon in international relations but also on the American response to the return of great power competition in the face of an assertive China and resurgent Russia The contributions gather the inputs of a transatlantic community of scholars combining academics think tank fellows former policy makers and administration officials from both sides of the Atlantic

The Transformation of the Liberal International Order Yuichi Hosoya, Hans Kundnani, 2023-10-24 This open access book aims to emphasize the potential for Japan Europe and Indo Pacific countries including the US to respond to shared domestic and international challenges on finding joint ways to uphold and develop the liberal international order LIO in the Asian Pacific region and the world It explores how these countries and the region the EU can work together to promote solidarity and cooperation to advance democratic standards and rules based norms globally The US understands the LIO in a political sense and centers its focus on democracy aiming to build a coalition of democracies opposed to China and Russia which represent a kind of authoritarian axis The US aims both to defend the LIO and respond to the China challenge and to build a coalition of countries that will do both In contrast European countries aim at defending the rules based order a term preferred because they fear that the concept of the LIO might alienate or antagonize non democratic countries They face a dilemma between working with China to reform the LIO or in seeking to defend it from China excluding China Germany and France differ regarding whether to play a passive or active role in the Indo Pacific the former choosing to preserve peace and stability for continued exports and until recently doing little to contribute to security Its views echo those of the ASEAN countries which are unable or unwilling to take an active role in protecting the LIO On the contrary France along with the UK actively carries out presence operations in the Indo Pacific Rather than upholding US dominance France supports a multipolar order that will also reduce China's influence in the region with France acting as a balancing power and offering an alternative to the choice between China and the United States Japan and India show interest in European views with the former leaning more toward its allies the US and AUKUS and the latter seeing Europe less as an alternative to the status quo and more as a complement of QUAD This book concludes that the US needs to build coalitions rather than forcing allies and neighbors to choose sides while Japan Asian countries and Europeans should more actively reform the LIO

China and the International Order Michael J. Mazarr, Timothy R. Heath, Astrid Stuth Cevallos, 2018-05-21 As economic power diffuses across more countries and China becomes more dependent on the

world economy Chinese leaders are being forced to abandon their largely passive approach to global governance This report analyzes China's interests and behavior to evaluate both the recent history of its interactions with the postwar international order and possible future trajectories It also draws implications from that analysis for future US policy *Global Cities and Global Order* Simon Curtis, 2016 This volume investigates the changing nature of cities in the international system and their increasing prominence in global governance and global order **Principles for Dealing with the Changing World Order** Ray Dalio, 2021-11-30 Examines history's most turbulent economic and political periods to reveal why the times ahead will likely be radically different from those in recent memory **Alliances in Asia and Europe** Elena

Atanassova-Cornelis, Yoichiro Sato, Tom Sauer, 2023-10-10 This book explores the transformation of the American led alliances as well as of US allies' responses to potential American disengagement from regional security amid the rising Russian and Chinese threats The post Cold War international order has led to three challenges for the West The first challenge was the ending of the Cold War which had served as the fundamental rationale of the US centred alliance systems in both Europe and Asia The second challenge was that while the fear of US disengagement in the post Cold War era was initially about its political willingness the relative decline of the US has gradually turned the question into that of capability And the third challenge is that for the first time since very long a war in which one of the great nuclear powers is involved takes place on European territory In Europe the immediate consequence of the war has been a strengthening of NATO In Asia and the Indo Pacific regional reactions to the war have been much more muted for the division between friends and foes remains less clear cut than in Europe The chapters in this volume bridge the dynamics in the European and Asian theatres and provide a comparative framework for examining security alignments amid the shifting strategic context of the Indo Pacific With 4 new chapters and a revised Introduction this book will be of great interest to students and researchers of Politics and International Relations Asian and European studies The other chapters were originally published in Asian Affairs

Competing Visions for International Order Ville Sinkkonen, Veera Laine, Matti Puranen, 2025-10-15 This book explores the international ordering visions of key global and regional powers in the international system from 2014 onwards Using a fourfold analytical framework based on the distributional normative institutional and temporal dimensions of the visions propagated by the relevant political elites in the states actors in question the book addresses the ultimate question in international relations for the coming decades To what extent can the visions pushed forward by the leading powers of the world be reconciled to arrive at a shared direction for international order writ large The book's analysis also offers normative prescriptions on how to avoid a tragic race to the bottom a fragmented world of competing orders where states are unable to address shared global crises and challenges such as pandemics cross border crime climate tragedies and armed conflict With this it concludes by recognising the importance of agency as well as political imagination in navigating the crisis ridden ordering moment of the international system This book will be of key interest to scholars and students in global order studies

and governance geopolitics regional studies foreign policy analysis as well as more broadly to international relations and security political history human geography and policymakers

Security Order and Strategic Alignment in Europe and the Asia-Pacific Elena Atanassova-Cornelis,Yoichiro Sato,Tom Sauer,2025-03-18 Elena Atanassova Cornelis Yoichiro Sato Tom Sauer and their contributors examine the implications of the shifts in power for the regional security order as the longterm relative decline of the US standing in the global hierarchy of power is more pronounced than ever due to the challenges it faces from the rising China in Asia and the reviving Russia in Europe The world is in disarray and the balance of power is shifting which results in enhanced tensions and wars including on the territory of Europe The complexity of the international order that prevails today possibly misleads us toward viewing everything in terms of a bipolar competition as predicted by systemic level realism While

membership of the multilateral NATO Alliance expands in Europe in light of the ongoing Russian invasion of Ukraine China's assertive behavior in Asia has produced numerous strategic alignments that are short of a formal alliance involving Asian states the US and European countries Hedging strategies are commonly found in Asian states approaches to security working against the bifurcation of powers Contrarily European entries into alignments in the Indo Pacific have demonstrated the inseparability of security in Asia from security in Europe through the shared thread of engaging the US Whether China defines its challenge against the US in regional or global terms also has differing implications for the evolution of the international system This book with contributions by Asian European and North American experts provides an overview of the two regions differing alignment paths in comparative and inter regional perspectives The book is a valuable resource for academics researchers practitioners and policy analysts interested in European and Asia Pacific security as well as international and regional security issues
