Piercing the Fog: Intelligence and Army Air Forces Operations in World War II , The War for Korea, 1950-1951 Allan R. Millett, 2021-09-07 In *The War for Korea 1945 1950* A House Burning one of our most distinguished military historians argued that the conflict on the Korean peninsula in the middle of the twentieth century was first and foremost a war between Koreans that began in 1948 In the second volume of a monumental trilogy Allan R Millett now shifts his focus to the twelve month period from North Korea's invasion of South Korea on June 25 1950 through the end of June 1951 the most active phase of the internationalized Korean War Moving deftly between the battlefield and the halls of power

Millett weaves together military operations and tactics without losing sight of Cold War geopolitics strategy and civil military relations Filled with new insights on the conflict his book is the first to give combined arms its due looking at the contributions and challenges of integrating naval and air power with the ground forces of United Nations Command and showing the importance of Korean support services He also provides the most complete and sympathetic account of the role of South Korea's armed forces drawing heavily on ROK and Korea Military Advisory Group sources Millett integrates non American perspectives into the narrative especially those of Mao Zedong Chinese military commander Peng Dehuai Josef Stalin Kim Il sung and Syngman Rhee And he portrays Walton Walker and Matthew Ridgway as the heroes of Korea both of whom had a more profound understanding of the situation than Douglas MacArthur whose greatest flaw was not his politics but his strategic and operational incompetence Researched in South Korean Chinese and Soviet as well as American and UN sources Millett has exploited previously ignored or neglected oral history collections including interviews with American and South Korean officers and has made extensive use of reports based on interrogations of North Korean and Chinese POWs The end result is masterful work that provides both a gripping narrative and a greater understanding of this key conflict in international and American history

The USS Flier Michael Sturma, 2008-02-15 The fate of the USS Flier is one of the most astonishing stories of the Second World War On August 13 1944 the submarine struck a mine and sank to the bottom of the Sulu Sea in less than one minute leaving only fourteen of its crew of eighty six hands alive After enduring eighteen hours in the water eight remaining survivors swam to a remote island controlled by the Japanese Deep behind enemy lines and without food or drinking water the crewmen realized that their struggle for survival had just begun On its first war patrol the unlucky Flier made it from Pearl Harbor to Midway where it ran aground on a reef After extensive repairs and a formal military inquiry the Flier set out once again this time completing a distinguished patrol from Pearl Harbor to Fremantle Western Australia Though the Flier's next mission would be its final one that mission is important for several reasons the story of the Flier's sinking illuminates the nature of World War II underwater warfare and naval protocol and demonstrates the high degree of cooperation that existed among submariners coast watchers and guerrillas in the Philippines The eight sailors who survived the disaster became the first Americans of the Pacific war to escape from a sunken submarine and return safely to the United States Their story of persistence and survival has all the elements of a classic World War II tale sudden disaster physical deprivation a ruthless enemy and a dramatic escape from behind enemy lines In *The USS Flier Death and Survival on a World War II Submarine* noted historian Michael Sturma vividly recounts a harrowing story of brave men who lived to return to the service of their country
