Ally Versus Ally America Europe And The Siberian Pipeline Crisis:

Ally Versus Ally Antony J. Blinken, 1987 **Ally Versus Ally** Antony J. Blinken, 1987 **European Integration and the Atlantic Community in the 1980s** Kiran Klaus Patel, Kenneth Weisbrode, 2013-09-02 This unique collection of essays lays the groundwork for the study of the intersection of European integration and transatlantic relations in the 1980s With archives for this period only recently being opened scholars are beginning to analyse and understand what some have called a peak moment in the European project and others have called the Second Cold War How do these moments intersect and relate to one another These essays by prominent scholars from Europe and the United States examine these and related questions while challenging the 1980s itself as a useful demarcation for historical analysis **The United States and the European Pillar** William C. Cronwell, 2016-07-27 The first major study of Atlantic political relations since World War 2 that uses a comparative perspective to analyze U S foreign policy and U S European relations in the context of a Western Europe attempting to speak with one voice The book examines U S policy toward European unity and the evolution of a West European pillar in foreign policy and defence contrasts U S and European approaches toward specific global issues and considers Atlantic relations in light of the dramatic European upheavals in 1989 90 Ibss: Political Science: 1987 British Library of Political and Economic Science, 1991 IBSS is the essential tool for librarians university departments research institutions and any public or private institutions whose work requires access to up to date and comprehensive knowledge of the social sciences *The Politics of International Economic Relations* Jeffrey A. Hart, Joan Edelman Spero, 2013-06-17 The first and definitive book of its kind Joan Spero s *The Politics of International Economic Relations* has been fully updated to reflect the sweeping changes in the international arena With the expertise of co author Jeffrey Hart the fifth edition strengthens the coverage of political and economic relations since the end of the Cold War economic polarization in developing nations and the roots of economic decline in centrally planned economies A new chapter on industrial policy and competitiveness debates further illustrates the changing dynamics of International Political Economy Ideal as a supplement to the International Relations course or as the core text in International Political Economy Spero and Hart s *The Politics of International Economic Relations* continues to give students the breadth and depth of scholarship needed to understand the politics of world economy US Foreign Policy Since 1945 Alan Dobson, Alan P. Dobson, Steve Marsh, 2007-01-24 This essential introduction to postwar US foreign policy combines chronologic and thematic chapters to provide an historical account of US policy and to explore key questions about its design control and effects **Transatlantic Energy Relations** John R. Deni, Karen Smith Stegen, 2016-04-08 Recent upheaval in the global energy system dramatic increases in demand led largely by developing countries significant decreases in supply as a result of local or regional conflicts and the growing nexus between the burning of hydrocarbons and climate change has unsettled long held notions of energy security For many years transatlantic cooperation helped undergird the system s stability but Europe and North America have drifted apart in several

key ways potentially undermining the search for energy sufficiency surety and sustainability Will the transatlantic partners continue on separate paths in the face of dramatic change in the global energy system or does the breadth and depth of the challenges they confront compel them to work more closely together In this edited volume experts from across Europe and North America including advisors to the executive and legislative branches of both the EU and the United States to senior military commanders and to major international organizations and companies examine the most salient facets of the transatlantic energy relationship and discern whether that relationship is characterized by growing convergence or divergence This book was based on a special issue of the Journal of Transatlantic Studies

The International Relations of the EU Steve Marsh, Hans Mackenstein, 2014-09-11 In an incisive and lively discussion International Relations of the EU examines both the economic and security dimensions of European Union external relations The book adopts an innovative approach that combines International Relations with International Political Economy Set against a backdrop of EU enlargement and disarray over military intervention in Iraq International Relations of the EU is a timely contribution to our understanding of the EU's role as an international actor The text is suitable for advanced undergraduate courses in Politics and International Relations

The United States and Germany in the Era of the Cold War, 1945-1990 Detlef Junker, Philipp Gassert, Wilfried Mausbach, David B. Morris, 2004-05-17 Publisher Description

Power, Energy, and the New Russian Imperialism Anita Orban, 2008-09-30 Russia is the world's foremost energy superpower rivaling Saudi Arabia as the world's largest oil producer and accounting for a quarter of the world's exports of natural gas Russia's energy reserves account for half of the world's probable oil reserves and a third of the world's proven natural gas reserves Whereas military might and nuclear weapons formed the core of Soviet cold war power since 1991 the Russian state has viewed its monopolistic control of Russia's energy resources as the core of its power now and for the future Since 2005 the international news has been filled with Russia's repeated demonstrations of its readiness to use price transit fees and supply of gas and oil exports as punitive policy instruments against recalcitrant states that were formerly part of the Soviet Union striking in turn the Ukraine Georgia Azerbaijan Armenia Belarus and Lithuania Orban reveals for the first time in *Power Energy and the New Russian Imperialism* Russia's

readiness to wield the same energy weapon against her neighbors on the west all of them former Soviet satellite states but now EU and NATO member nations the three Baltic nations and the five East European nations of Poland Slovakia Hungary the Czech Republic and Slovenia Orbán shows how the Kremlin since 1991 has systematically used Russian energy companies as players in a concerted neo mercantilist energy based foreign policy designed to further Russia's neo imperial ambitions among America's key allies in Central East Europe Her unprecedented analysis is key to predicting Russia's strategic response to American negotiations with Poland and the Czech Republic to host the US missile shield She also reveals the economic and diplomatic modus operandi by which Russia will increasingly apply its energy clout to shape and coerce the foreign policies of the West European members of the EU as Russia's contribution to EU gas consumption increases from a quarter today to three quarters by 2020 Orbán proves that Russia's neo mercantilist energy strategy in East Europe is not at all dependent on the person of Putin but began under Yeltsin and continues under Medvedev the former chairman of Gazprom

Обратный эффект санкций. Как санкции меняют мир не в интересах США Агата Демае, 2024-06-14 COVID 19 **The West European Allies, the Third World, and U.S. Foreign Policy** Richard Payne, 1991-10-07 Payne provides a comprehensive analysis of the underlying tensions as well as cooperation between the US and NATO countries in out of area conflicts The American Economic Review, 1987 Includes annual List of doctoral dissertations in political economy in progress in American universities and colleges and the Hand book of the American Economic Association *International Summitry and Global Governance* Emmanuel Murlon-Druol, Federico Romero, 2014-03-05 This volume is the first detailed study of the emergence of regular and frequent heads of government meetings summits covering the period from the mid 1970s to the early 1990s Summit meetings of heads of government have become banal in today's world Yet they are a relatively recent practice that took off only in the mid 1970s The aim of the book is to explore the origins of this new feature of global governance in its historical context Why did heads of Western governments decide to regularly meet up in the European Council and the G7 What were they aiming at How were these meetings run and what consequences did they have How did other actors of international relations states as well as non state and or transnational actors react to this transformation Based on newly released archival material *International Summitry and Global Governance* investigates the rise of regular international summitry and its impact on international relations The volume brings together the best specialists of this new field of historical enquiry in order to explore those features of global governance in their historical context and open up an interdisciplinary dialogue with social scientists who have studied summits from their own disciplinary perspectives This book will be of much interest to students of international history Cold War studies global governance foreign policy and IR in general **Europe Since 1945** Mary Fulbrook, 2001 This text brings home the waves of transformation that have washed across Europe in the second half of the 20th century sketching out general patterns of this change and exploring some of the local themes and variations in parts of Europe States, Firms,

and Power George E. Shambaugh,1999-08-12 Analyses the effectiveness of economic sanctions as instruments of statecraft

The United States, Western Europe and the Polish Crisis H. Sjursen,2002-12-10 This book examines the response of the Western Alliance to the Polish Crisis 1980 83 The author analyses the different views of Europe and the United States regarding enforcement in East West relations and the opposition in Western Europe to the American approach This case exemplifies the lasting differences in attitude within the Western Alliance

Natural Gas and Geopolitics David G. Victor,Amy M. Jaffe,Mark H. Hayes,2006-06-29 By most estimates global consumption of natural gas a cleaner burning alternative to coal and oil will double by 2030 However in North America Europe China and South and East Asia which are the areas of highest expected demand the projected consumption of gas is expected to far outstrip indigenous supplies Delivering gas from the world s major reserves to the future demand centres will require a major expansion of inter regional cross border gas transport infrastructures This book investigates the implications of this shift utilizing historical case studies as well as advanced economic modelling to examine the interplay between economic and political factors in the development of natural gas resources The contributors aim to shed light on the political challenges which may accompany a shift to a gas fed world
