Filler,2012-12-06 This revised edition of Garland's 1989 publication updates the core bibliography on Gustave Mahler as well as his spouse and fellow composer Alma Mahler by incorporating new research gathered over the past dozen years on his life and professional works Gustave Mahler renowned conductor and composer of symphonies and song cycles is one of the foremost musical figures of the late nineteenth and early twentieth centuries His symphonies continue to be widely performed and studied through the twenty first century Organized in sections according to subject matter references are arranged alphabetically by the names of authors or editors Filler's research has produced sources for musicologists and students in nineteen languages offering a resource that expands traditional English language music scholarship      **French Women in Politics: Writing Power** Raylene L. Ramsay,2003 Although more women in France have entered political life than ever before the fact remains that there are fewer women representatives in the French parliament than there were after the Second World War In a new and original approach the author presents an overview and analysis of the emerging body of text by or on women who have held high political office in France The argument is that writing about women and politics has not just described or reflected women's slow but now substantial entry into political life it has played a major part in shaping the parity debate and its outcomes Interviews with political women such as Huguette Bouchard and Simone Veil or Edith Cresson inserted in the text demonstrate the emergence and circulation of a new common discourse focused on the issue of whether women in politics make or should make a difference A close reading of the various texts examined in this book and their connection to new public counter discourses in France suggest that a re writing of power is indeed occurring      **Women and Gender in Central and Eastern Europe, Russia, and Eurasia** Mary Zirin,Irina Livezeanu,Christine D.
