Third Series** Library of Congress. Copyright Office, 1965 Includes Part 1 Number 2 Books and Pamphlets Including Serials and Contributions to Periodicals July December *The World of Myth* David Adams Leeming, 1992-02-27 Hercules Zeus Thor Gilgamesh these are the figures that leap to mind when we think of myth But to David Leeming myths are more than stories of deities and fantastic beings from non Christian cultures Myth is at once the most particular and the most universal feature of civilization representing common concerns that each society voices in its own idiom Whether an Egyptian story of creation or the big bang theory of modern physics myth is metaphor mirroring our deepest sense of ourselves in relation to existence itself Now in *The World of Myth* Leeming provides a sweeping anthology of myths ranging from ancient Egypt and Greece to the Polynesian islands and modern science We read stories of great floods from the ancient Babylonians Hebrews Chinese and Mayans tales of apocalypse from India the Norse Christianity and modern science myths of the mother goddess from Native American Hopi culture and James Lovelock's Gaia Leeming has culled myths from Aztec Greek African Australian Aboriginal Japanese Moslem Hittite Celtic Chinese and Persian cultures offering one of the most wide ranging collections of what he calls the collective dreams of humanity More important he has organized these myths according to a number of themes comparing and contrasting how various societies have addressed similar concerns or have told similar stories In the section on dying gods for example both Odin and Jesus sacrifice themselves to renew the world each dying on a tree Such traditions he proposes may have their roots in societies of the distant past which would ritually sacrifice their kings to renew the tribe In *The World of Myth* David Leeming takes us on a journey not through a maze of falsehood but through a marvellous world of metaphor metaphor for the story of the relationship between the known and the unknown both around us and within us Fantastic tragic bizarre sometimes funny the myths he presents speak of the most fundamental human experience a part of what Joseph Campbell called the wonderful song of the soul's high adventure **Creation Stories** Anthony Aveni, 2021-04-20 An accessible exploration of how diverse cultures have explained humanity's origins through narratives about the natural environment Drawing from a vast array of creation myths Babylonian Greek Aztec Maya Inca Chinese Hindu Navajo Polynesian African Norse Inuit and more this short illustrated book uncovers both the similarities and differences in our attempts to explain the universe Anthony Aveni an award winning author and professor of astronomy and anthropology examines the ways various cultures around the world have attempted to explain our origins and what roles the natural environment plays in shaping these narratives The book also celebrates the audacity of the human imagination Whether the first humans emerged from a cave as in the Inca myths or from bamboo stems as the Bantu people of Africa believed or whether the universe is simply the result of Vishnu's cyclical inhales and exhales each of these fascinating stories reflects a deeper understanding of the culture it arose from as well as

its place in the larger human narrative      *The Oxford Encyclopedia of Women in World History* Bonnie G. Smith, 2008 The Encyclopedia of Women in World History captures the experiences of women throughout world history in a comprehensive 4 volume work Although there has been extensive research on women in history by region no text or reference work has comprehensively covered the role women have played throughout world history The past thirty years have seen an explosion of research and effort to present the experiences and contributions of women not only in the Western world but across the globe Historians have investigated women's daily lives in virtually every region and have researched the leadership roles women have filled across time and region They have found and demonstrated that there is virtually no historical social or demographic change in which women have not been involved and by which their lives have not been affected The Oxford Encyclopedia of Women in World History benefits greatly from these efforts and experiences and illuminates how women worldwide have influenced and been influenced by these historical social and demographic changes The Encyclopedia contains over 1 250 signed articles arranged in an A Z format for ease of use The entries cover six main areas biographies geography and history comparative culture and society including adoption abortion performing arts organizations and movements such as the Egyptian Uprising and the Paris Commune women's and gender studies and topics in world history that include slave trade globalization and disease With its rich and insightful entries by leading scholars and experts this reference work is sure to be a valued go to resource for scholars college and high school students and general readers alike

interpreters of the Continental philosophical tradition offers a philosophical history of the evolving conceptualizations of place and space in Western thought Not merely a presentation of the ideas of other philosophers The Fate of Place is acutely sensitive to silences absences and missed opportunities in the complex history of philosophical approaches to space and place A central theme is the increasing neglect of place in favor of space from the seventh century A D onward amounting to the virtual exclusion of place by the end of the eighteenth century Casey begins with mythological and religious creation stories and the theories of Plato and Aristotle and then explores the heritage of Neoplatonic medieval and Renaissance speculations about space He presents an impressive history of the birth of modern spatial conceptions in the writings of Newton Descartes Leibniz and Kant and delineates the evolution of twentieth century phenomenological approaches in the work of Husserl Merleau Ponty Bachelard and Heidegger In the book s final section Casey explores the postmodern theories of Foucault Derrida Tschumi Deleuze and Guattari and Irigaray

**Encyclopedia of Ancient Deities** Charles Russell Coulter, Patricia Turner, 2021-12-06 Throughout history humans have pondered the question of their existence In nearly every society part of the answer has included some form of god or goddess For the Mayans one such deity was Ajtzak who tried to create humans from wood for the Yorubas of Africa Shango controlled the thunder and lightning The Chinese of the Shang dynasty era worshipped Shang Ti Evil deities were also part of the answer as in the case of the Kuvera the Hindu chief of evil in the Vedic period and Tu the Persian or Islamic demon of fatal accidents All of the known ancient gods many heretofore obscure or known only from mythological literature are included in this exhaustive reference work The focus is on their origins histories and functions The people who believed in each deity are identified along with alternate names or spellings both old and modern The descriptions that follow are of the functions origins and physical nature of the deities Extensive cross references are provided for alternate spellings and names

**The Science of the Dogon** Laird Scranton, 2006-09-22 A look at the close resemblance between the creation and structure of matter in both Dogon mythology and modern science Reveals striking similarities between Dogon symbols and those used in both the Egyptian and Hebrew religions Demonstrates the parallels between Dogon mythical narratives and scientific concepts from atomic theory to quantum theory and string theory The Dogon people of Mali West Africa are famous for their unique art and advanced cosmology The Dogon s creation story describes how the one true god Amma created all the matter of the universe Interestingly the myths that depict his creative efforts bear a striking resemblance to the modern scientific definitions of matter beginning with the atom and continuing all the way to the vibrating threads of string theory Furthermore many of the Dogon words symbols and rituals used to describe the structure of matter are quite similar to those found in the myths of ancient Egypt and in the daily rituals of Judaism For

example the modern scientific depiction of the informed universe as a black hole is identical to Amma s Egg of the Dogon and the Egyptian Benben Stone The Science of the Dogon offers a case by case comparison of Dogon descriptions and drawings to corresponding scientific definitions and diagrams from authors like Stephen Hawking and Brian Greene then extends this analysis to the counterparts of these symbols in both the ancient Egyptian and Hebrew religions What is ultimately revealed is the scientific basis for the language of the Egyptian hieroglyphs which was deliberately encoded to prevent the knowledge of these concepts from falling into the hands of all but the highest members of the Egyptian priesthood The Science of the Dogon also offers compelling new interpretations for many of the most familiar Egyptian symbols such as the pyramid and the scarab and presents new explanations for the origins of religiously charged words such as Jehovah and Satan When the Golden Bough Breaks Peter Munz,2016-03-02 This original provocative study first published in 1973 presents a new method of interpretation of mythology and reveals the wide ranging implications of this universal phenomenon for many disciplines The volume begins with a sympathetic but critical examination of L vi Strauss s interpretation of mythology Professor Munz points out the deficiencies in structuralist interpretations and takes L vi Strauss s neglect of the historicity of all myths as a starting point for an alternative approach to mythology Myths he argues come in typological series If the whole series is read forward to the most specific version the myths will reveal their inherent meaning typologically

**Afro-Eccentricity** W.
