Hungary I had rich experience of travelling by train car as well as by hitchhiking During my entire stay I met many colourful jovial and compassionate personalities in different fields and had entered into very lively discussions about man woman relationships including love sex marriage and divorce women s position in the east and west definition of character and virtuousness religion and other socio political developments The cultural and social differences between Europe and India also featured An attempt has also been made to look into the causes of the recent disintegration of Yugoslavia in the early nineties of the last century

Finding a Path for China's Rise Philippe Lionnet,2023-01-02 The rise of China is ever present in debates on globalisation and ongoing power shifts In a time of rising international tensions understanding the interdependencies between China s course and the world economy is ever more important Often the economic reforms under Deng Xiaoping after 1978 are emphasised They initiated dramatic changes in China s economy and contributed to its ascent as a world power In contrast less attention has been given to the context in which these reforms were implemented Philippe Lionnet analyses important adjustments in China s agricultural industrial and foreign trade policies in the course of the 1970s as well as their origins He shows how policy experiments and their limits shaped the path of the socialist state

Comparative Economic Systems A. Zimbalist,2012-12-06 3 edge methods and theory I turn now to some of my own reflections on this score Some Reflections My first proposition is that if we are interested in analyzing the performance and dynamic properties of the world s economies it is only at significant peril that comparative economists can overlook noneconomic or political factors This is not to say that it is illegitimate to abstract from non economic factors for particular purposes rather such abstraction should occur only with cogni zance of the influences being suppressed I have

argued elsewhere that the analytical compromise in suppressing noneconomic variables is greater for the study of planned than for market economies 7 Borrowing from Polanyi 8 it is claimed that in market systems the economic sphere is disembedded from separate and not subordinate to the political social and cultural spheres while in planned systems the economic sphere is embedded in the noneconomic spheres To be sure market economies are strongly affected by political and cultural factors but planned economies have and often exercise the potential to let political goals dominate in making production allocational or distributional choices Indeed it is difficult in practice to separate out what are political and what are economic decisions in planned systems

The Programming Approach and the Demise of Economics Franco Archibugi, 2019-11-21 This trilogy deals with an epistemology of economics arguing for a radical overturning of conventional analysis and providing an alternative to political economy and social sciences based not on positivism but on a normative and programming paradigm Volume III furthers and concludes work presented in Volume I and Volume II and introduces a concrete and practical example of how to build a Planning Accounting Framework PAF as associated with Frisch's plan frame explored in Volume II to demonstrate the extent to which decisions and negotiations can be routed in the social sciences The PAF is an instrument of the programming approach that can be used to verify the compatibility of decisions and their effects The author builds on Frisch's classical PAF to maximise the phenomenology of economic systems and assure a consistent and effective implementation of decision

making **A Study of Alternatives to the Davis (West Virginia) Pumped Storage Project**, 1980 National Economic Planning Don Lavoie, 1985-06-01 Don Lavoie argues that the radical Left's enthusiasm for planning has been a tragic mistake and that progressive social change requires the abandonment of this traditional view Lavoie argues that planning whether Marxism economic democracy or industrial policy can only disrupt social and economic coordination He challenges both radicals and their critics to begin reformulating our whole notion of progressive economic change without reliance on central planning National Economic Planning What is Left will challenge thinkers and policymakers of every political persuasion
