*Education* Phillip Brown, Professor School of Social Sciences Phillip Brown, Hugh Lauder, Professor of Education and Political Economy Hugh Lauder, 2011-12-08 What unites the contributors to this book is an opposition to Thatcherite policies on education and an agreement upon the need for the development of democracy in education This volume highlights the importance of an area of neglected theoretical and practical concern the development of a critique of the philosophy and policies of the new Right and of credible alternative policies

*The Role of Public Policy in K-12 Science Education* George E. DeBoer, 2011-01-01 The goal of this volume of Research in Science Education is to examine the relationship between science education policy and practice and the special role that science education researchers play in influencing policy It has been suggested that the science education research community is isolated from the political process pays little attention to policy matters and has little influence on policy But to influence policy it is important to understand how policy is made and how it is implemented This volume sheds light on the intersection between policy and practice through both theoretical discussions and practical examples This book was written primarily about science education policy development in the context of the highly decentralized educational system of the United States But because policy development is fundamentally a social activity involving knowledge values and personal and community interests there are similarities in how education policy gets enacted and implemented around the world This volume is meant to be useful to science education researchers and to practitioners such as teachers and administrators because it provides information about which aspects of the science education enterprise are affected by state local and national policies It also provides helpful information for researchers and practitioners who wonder how they might influence policy In particular it points out how the values of people who are affected by policy initiatives are critical to the implementation of those policies
