Alternative Teacher Certification A Statebystate Analysis 2003:

Alternative Teacher Certification C. Emily Feistritz, 2003 Teacher Certification and the Professional Status of Teaching in North America Peter P. Grimmett, Jon C. Young, Claude Lessard, 2012-12-01 This book locates recent developments in teacher certification in North America within a broader international policy context characterized as hegemonic neo liberalism wherein economic rationalism has begun to trump professional judgment We focus on teacher certification because it addresses fundamental questions about who will teach what are the required minimum levels of competence and who will make those decisions Such questions are central to teaching constituting a new battleground for education in North America Two ideas economic rationalism and professionalization have become pivotal to education policy Economic rationalism finds its expression in a free market ideology Professionalization has two meanings professionalizing the practice of teaching constructing a professional knowledge base and professionalizing the status of teaching through links with universities and self regulation These ideas contestation varies by setting In the USA neo liberalism has attacked professional knowledge questioning its scientific veracity Professionalization advocates claim that the neo liberalist aim is to undermine teaching as a profession In Canada neo liberalist critics are heard but have limited impact on policy Professionalization has emphasized teachers pedagogical development and a valuing of the field s input into teacher preparation Neo liberalist economic rationalism plays itself out overtly in the USA as de regulation in Canada it lies embedded within labor mobility agreements In the USA professionalization highlights professionalism in practice in Canada the governance of teaching This book explores how economic rationalism is using labor mobility agreements in Canada as a covert operation analogous to de regulation in the USA to assert its dominance in the battle to de professionalize teaching in North America International Handbook of Educational Policy Nina Bascia, Alister Cumming, Amanda Datnow, Kenneth Leithwood, David Livingstone, 2008-05-14 Nina Bascia Alister Cumming Amanda Datnow Kenneth Leithwood and David Livingstone This Handbook presents contemporary and emergent trends in educational policy research in over fty chapters written by nearly ninety leading researchers from a number of countries It is organized into ve broad sections which capture many of the current dominant educational policy foci and at the same time situate current understandings historically in terms of both how they are conceptualized and in terms of past policy practice The chapters themselves are empirically grounded providing illustrations of the conceptual implications c tained within them as well as allowing for comparisons across them The se re exivity within chapters with respect to jurisdictional particularities and c trasts allows readers to consider not only a range of approaches to policy analysis but also the ways in which policies and policy ideas play out in di erent times and places The sections move from a focus on prevailing policy tendencies through increasingly critical and outsider perspectives on policy They address in turn the contemporary strategic emphasis on large scale reform substantive emphases at several levels on leadership and governance improving teacher quality and conceptualizing learning in various

domains around the notion of literacies and concluding with a contrasting topic workplace learning which has had less policy attention and thus allows readers to consider both the advantages and disadvantages of learning and teaching under the bright gaze of policy Second Handbook of Research on Mathematics Teaching and Learning Frank K.

Lester, 2007-02-01 The audience remains much the same as for the 1992 Handbook namely mathematics education researchers and other scholars conducting work in mathematics education This group includes college and university faculty graduate students investigators in research and development centers and staff members at federal state and local agencies that conduct and use research within the discipline of mathematics The intent of the authors of this volume is to provide useful perspectives as well as pertinent information for conducting investigations that are informed by previous work The Handbook should also be a useful textbook for graduate research seminars In addition to the audience mentioned above the present Handbook contains chapters that should be relevant to four other groups teacher educators curriculum developers state and national policy makers and test developers and others involved with assessment Taken as a whole the chapters reflects the mathematics education research community's willingness to accept the challenge of helping the public understand what mathematics education research is all about and what the relevance of their research findings might be for those outside their immediate community Handbook of Research on Teacher Education Marilyn Cochran-Smith, Sharon
