Discourses of Philology and Theology in Nietzsche Paul Bishop, 2023-10-31 This study proposes to examine the tension in Nietzsche's works between two competing discourses i.e the discourse of theology and the discourse of philology It argues that in order to understand Nietzsche's complicated standpoint and the aim of his Kulturkritik we have to appreciate how he operates with two different discourses one indexed to belief faith liturgy i.e the discourse of theology and another indexed to analytical reason sceptical investigation and logical argumentation as well as historical context and linguistic precision i.e the discourse of philology Its core thesis is that in the end Nietzsche can no longer believe because he thinks he has uncovered a fraudulent production of meaning in the texts in a way that is comparable with his insight into the production of morality in On the Genealogy of Morals 1887 **I Am Put Here for the Defense of the Gospel** Terry L.

Mahbub H. Khan,2023-11-22 Humanity was once scattered into small sized nomadic groups that barely knew each other Each lived inside its bubble of myths and beliefs The notion of one single community related by a common origin and similar aspirations the world began to evolve along with the founding of early civilizations It was an auspicious development that has changed not only the way we live but also how we think We are the only species probing the mysteries of nature and life Curiously the story of how wandering Homo sapiens who had lived off nature for hundreds of thousands of years created civilization is less well known compared to the awareness about biological evolution If you have wondered what led to the establishment of advanced societies in ancient Egypt Mesopotamia China Central America and the Andean Highlands this book is for you Making of the World Sapiens Journey from Wilderness to Civilization leads the reader through an absorbing narrative that canvasses the broad sweeps of human history The book brings readers up to date on trusted research findings in archaeology anthropology and evolutionary psychology In so doing it dispels the fog of ideologically biased interpretations of history Students planning to pursue higher education in humanities will find in the book a suitable introduction to a wide range of topics including the origin of cities and governments poetry and philosophy The Arts of Eastern Philosophy

PhD,2011-04-06 Is God a human invention With *And Man Created God* Robert Banks embarks on a passionate discussion that

explores the origins of God How did God come to exist if he was responsible for making everything in the first place This is an example of a question that religious believers may find difficult to answer The question was first asked by Ancient Greek philosophers and has continued to be asked by both believers and atheists Robert Banks wants to find an answer He will guide you through the history of the objection and consider insights from ancient Greek philosophers as well as more modern day objections from Freud Marx and other great analytical minds And Man Created God is a fascinating book that comprehensively explores all possibilities and opinions about the origins of God Robert Banks has produced a fascinating book that can be considered particularly useful for somebody who holds an interest in religion or new atheism Ultimately the book explores the issue of whether God could be the product of man rather than the other way around **Islamic**

The Critical Study of Non-Religion Christopher R. Cotter, 2020-07-09 This book acts as a bridge between the critical study of religion and empirical studies of religion in the real world Chris Cotter presents a concise and up to date critical survey of research on non religion in the UK and beyond before presenting the results of extensive research in Edinburgh s Southside which blurs the boundary between religion and non religion In doing so Cotter demonstrates that these are dynamic subject positions and phenomena can occupy both at the same time or neither depending on who is doing the positioning and what issues are at stake This book details an approach that avoids constructing religion as in some way unique whilst also fully incorporating non religious subject positions into religious studies It provides a rich engagement with a wide variety of theoretical material rooted in empirical data which will be essential reading for those interested in critical sociological and anthropological study of the contemporary non religious landscape
