Alternative Conceptions of Phrase Structure Mark R. Baltin, Anthony S. Kroch, 1989-07-10 In the early years of generative grammar it was assumed that the appropriate mechanism for generating syntactic structures was a grammar of context free rewriting rules The twelve essays in this volume discuss recent challenges to this classical formulation of phrase structure and the alternative conceptions proposed to replace it Each article approaches this issue from the perspective of a different linguistic framework such as categorical grammar government binding theory head driven phrase structure grammar and tree adjoining grammar By contributing to the understanding of the differing assumptions and research strategies of each theory this volume serves as an important

Investigations of the Syntax-semantics-pragmatics Interface Robert D. Van Valin, 2008 *Investigations of the Syntax Semantics Pragmatics Interface* presents on going research in Role and Reference Grammar in a number of critical areas of linguistic theory verb semantics and argument structure the nature of syntactic categories and syntactic representation prosody and syntax information structure and syntax and the syntax and semantics of complex sentences In each of these areas there are important results which not only advance the development of the theory but also contribute to the broader theoretical discussion In particular there are analyses of grammatical phenomena such as transitivity in Kabardian the verbless numeral quantifier construction in Japanese and an unusual kind of complex sentence in Wari Chapakuran Brazil which not only illustrate the descriptive and explanatory power of the theory but also present interesting challenges to other approaches In addition there are papers looking at the implications and applications of Role and Reference Grammar for neurolinguistic research parsing and automated text analysis **Deconstructing Syntactic Theory** Peter W.

Culicover, Giuseppe Varaschin, 2025-05-28 *Deconstructing Syntactic Theory* is a critical examination of the assumptions and methodologies of contemporary derivational syntactic theory The study ranges from the earliest work inspired by Chomsky's *Syntactic Structures* and *Aspects of the Theory of Syntax* to the present day Minimalist Program The book begins with an examination of the relationship between syntactic structure linear order and meaning and the role of uniformity in motivating derivational analysis that assume movement and invisible structure A central property of such analyses is that they are cryptoconstructional construction specific stipulations are assumed in order to derive the form and meaning of expressions The second part looks at a range of technical and empirical problems of derivational syntax which require theoretical stipulations and devices to properly constrain cryptoconstructional analyses The focus is particularly on problems relating to movement and problems of invisibility In Part III the authors turn to the question of the independent justification of syntactic structure arguing that much hierarchical structure is not only unnecessary but also does not yield optimal analyses for a number of grammatical phenomena Part IV focuses on the use of syntax to account for phenomena that are arguably not syntactic it concludes that using syntax to model semantic phenomena is at best not necessary and at worse empirically inadequate Similarly using syntax to model morphological relations works only for a narrow subset of cases and cannot be sustained more generally without causing significant internal problems The book concludes with a review of minimalism laying out aspects of the logic of the Minimalist Program its assumptions and their motivations and consequences The authors argue that minimalism is best achieved by a leaner theory of linguistic representations along the lines of the constructional architecture of *Simpler Syntax* as proposed by Culicover and Jackendoff 2005 **Directory of German**

Studies Alan Ng, Valters Nollendorfs, 1996 *The Cambridge Review* , 1884 Vols 1-26 include a supplement The University Pulpit vols 1-26 no 1-661 which has separate pagination but is indexed in the main vol Causatives and Causation Jae Jung

Song,2014-06-11 Causatives and Causation is the first comprehensive study of causative constructions found in the world s languages This important new research based on a data base of more than 600 languages not only investigates fully the richness and variety of causative types but also presents an alternative perspective to the traditional typological approach The new typology enables a better understanding of how the human mind cognizes causation and how this is reflected in language Causatives and Causation is also an important attempt to integrate language typology with diachrony by constructing a diachronic model of causative affixes on the basis of this new typology Drawing on the theoretical insight of Role and Reference Grammar this book provides a case study of the causative constructions in Korean providing additional support for both the proposed new typology and the diachronic model It also examines the pragmatic foundations of causatives an important but previously unexplored area of study The L2 Acquisition of Tense-aspect Morphology M.

Rafael Salaberry,Yasuhiro Shirai,2002 The present volume provides a cross linguistic perspective on the development of tense aspect in L2 acquisition Data based studies included in this volume deal with the analysis of a wide range of target languages Chinese English Italian French Japanese and Spanish Theoretical frameworks used to evaluate the nature of the empirical evidence range from generative grammar to functional typological linguistics Several studies focus on the development of past tense markers but other issues such as the acquisition of a future marker are also addressed An introductory chapter outlines some theoretical and methodological issues that serves as relevant preliminary reading for most of the chapters included in this volume Additionally a preliminary chapter offers a substantive review of first language acquisition of tense aspect morphology The analysis of the various languages included in this volume significantly advances our understanding of this phenomenon and will serve as an important basis for future research **Second Language**

Argument Linking Ina Bornkessel, Matthias Schlesewsky, Bernard Comrie, Angela D. Friederici, 2009-09-24 The concept of
 semantic roles has been central to linguistic theory for many decades More specifically the assumption of such
 representations as mediators in the correspondence between a linguistic form and its associated meaning has helped to
 address a number of critical issues related to grammatical phenomena Furthermore in addition to featuring in all major
 theories of grammar semantic or thematic roles have been referred to extensively within a wide range of other linguistic
 subdisciplines including language typology and psycho neurolinguistics This volume brings together insights from these
 different perspectives and thereby for the first time seeks to build upon the obvious potential for cross fertilisation between
 hitherto autonomous approaches to a common theme To this end a view on semantic roles is adopted that goes beyond the
 mere assumption of generalised roles but also focuses on their hierarchical organisation The book is thus centred around the
 interdisciplinary examination of how these hierarchical dependencies subserve argument linking both in terms of linguistic
 theory and with respect to real time language processing and how they interact with other information types in this process
 Furthermore the contributions examine the interaction between the role hierarchy and the conceptual content of generalised
 semantic roles and investigate their cross linguistic applicability and psychological reality as well as their explanatory
 potential in accounting for phenomena in the domain of language disorders In bridging the gap between different disciplines
 the book provides a valuable overview of current thought on semantic roles and argument linking and may further serve as a
 point of departure for future interdisciplinary research in this area As such it will be of interest to scientists and advanced
 students in all domains of linguistics and cognitive science *Communicating Conflict* Elizabeth Thomson, P. R. R.
 White, 2008-03-28 *Communicating Conflict* brings together a collection of multilingual case studies drawn from the
 international media The contributors use methodologies drawn from Critical Discourse Analysis and Systemic Functional
 Linguistics to explore how these texts overtly or covertly advance particular value positions and world views They pay
 particular attention to how the reader is positioned with respect to the events being described and using appraisal theory the
