## **Alternatives To Violence A Stimulus To Dialogue:**

Alternative Approaches To the Study of Sexual Behavior Donn Byrne, Kathryn Kelley, 2022-10-10 First published in 1986 This book focuses on a multiciliary approach to studying sexual behavior It purports that biosexual sociosexual and psychosexual research can be combined within a single framework as they are complementary rather than in conflict and together they provide an integrative picture of human sexual functioning

**Racial Segregation and Eugenical Science Between the Wars** Michael L. Blakey, 2025-07-18 This volume examines the rise and decline of racial science and its relationship to the political and social imposition of Jim Crow in the American South a racialized code of laws grounded upon an inherently racist and prejudicial pseudoscience The author argues here that the study of human beings within the emerging 18th and 19th century institutions of Western science was corrupted by the limited social intuitions of its enslaving colonizing and elitist members Western science and White societies plowed forward in continued ideological adherence to a biodeterministic imagination to justify slavery then Jim Crow racial segregation immigration restriction and other deadly and exploitative eugenical solutions of Social Darwinist thought The story is further complexified by the countervailing theories and voices of Black and Jewish intellectuals in the social and biocultural sciences in the 19th and 20th centuries such as Frederick Douglass W E B Du Bois and Montague Cobb These had profound consequences not only for the social sciences but also for the cultural life of Black Americans in the aftermath and afterlife of slavery At the same time even here the author discloses that the racialized dimensions of social science could not be fully exorcised as social science continued to construct soft line racism in that it selectively primitivized darker people and omitted White racism and colonialism from their human story African American social scientists and historians brought White racism and Black modernity to the fore Eugenics had begun to paint marginal White people Jewish and Italian immigrants to the United States as natural inferiors to Nordics or Aryans with devastating consequences in World War II Europe As the War ended the world community began its turn against racism in science and society In constructing this historical and sociological counternarrative the author provides a critical new social history that illuminates a tangled and turgid past for contemporary readers students and researchers with vital insights for anthropology sociology history cultural studies philosophy and American studies

Anthropology and Slavery at the Dawn of White Supremacy Michael L. Blakey, 2025-07-18 This volume examines biological and cultural data that debunk a primordial basis for racism It tracks the ancient history of all social inequity to agricultural and feudal societies The book then focuses on social and ideological developments in European societies associated with religious justifications for the enslavement of others The European Enlightenment built upon those prejudices with ideas about nature and acceptable natural causes of unequal social status for people newly classified into biological races Nineteenth century anthropology is critiqued by African diasporic scholars who are the first Americans to argue that nurture rather than nature is responsible for human variation The American Civil War brought slavery nearly to an end but racist science continued to grow as eugenics

applied to justify otherwise unjustifiable structures of human inequality such as Jim Crow segregation as though they are morally sound In constructing this historical and sociological counternarrative the author provides a critical new social history that illuminates a tangled and turgid past for contemporary readers students and researchers with vital insights for anthropology sociology history cultural studies philosophy and American studies Footsteps Into the Future Rajni Kothari,1975 Monograph on social problems of the present world system and model for future social change in particular through regional cooperation includes references **Critique and Affirmation in Erich Fromm** Matheus

Romanetto,2024-08-20 Critique and Affirmation in Erich Fromm explores the relations between Erich Fromm s theory and practice in politics and the psychoanalytic clinic their points of continuity and contradiction Drawing on a systematic reading of Fromm s published output as well as extensive research in the Fromm archives Matheus Romanetto extracts the fragments of ontology logic and ethics implicit in his writings leading to a re evaluation of Fromm s place in 20th century intellectual history Interpolated with the theoretical argument are three historical excursi thematizing Fromm s practice in political life religious life and the psychoanalytic clinic setting the grounds for a new political sociology of radical humanism and critical theory Critique and Affirmation in Erich Fromm will be of great interest to psychoanalysts and to scholars of psychoanalytic studies sociology contemporary philosophy political theory and critical theory **Connections Between Sexuality and**

**Aggression** Dolf Zillmann,2021-02-25 This is the only available comprehensive monograph on interrelations and interdependencies between agonistic and sexual behaviors Integrating theory and research from biology anthropology neurophysiology endocrinology psychophysiology and psychology this book focuses on the mechanisms that govern the mutual influences between sexuality and aggression in behavior sequences and especially in admixtures of aggressive sexual behaviors This book places human agonistic and sexual behaviors into an evolutionary context It offers a Weltbild of human aggressive sexual behaviors by tracing their biological and developmental origins and examines the plasticity and manipulability of connections between agonistic and sexual behaviors Strategies for the maximization of sexual pleasures are elaborated and intervention treatments aiming at the control of violent behaviors are considered Coercive sexuality is given special attention Prevalent motive ascriptions to rape are called into question and the motivation that dominates rape is reinterpreted in the context of pleasure maximization This second edition brings the coverage of pertinent research up to date It advances the exploration of aggressive sexual behaviors by further integrating the research contributions from various disciplines and by refining and unifying theory capable of explaining the behavioral phenomena under consideration COPY FOR ZILLMANN MAILER Zillmann examines issues such as sexual access through aggression the involvement of agonistic behavior within sexuality sex aggression fusion the consequences of anticipatory imagination concerning sexuality and aspects of libido loss due to excitatory habituation This book also traces connection between sexuality and aggression in nonhuman species especially in nonhuman primates subjects human behavior to comparative and evolutionary analysis

examines connectedness in neurological and endocrinological terms details both central and autonomic commonalities between sexual and aggressive behaviors outlines sexual dimorphism and chromosomal endocrine aberrations pays special attention to adrenal commonalities in sexual and aggressive behaviors and the fusion of these behaviors and examines aggressive sexual connectedness in the analysis of motivation and emotion Zillmann finally proposes new explanations for the numerous documented associations between sexuality and aggression These proposals combine biological neuroendocrine autonomic and cognitive aspects of aggressive and sexual behaviors A trichotomy of excitatory interdependencies is developed for fight flight and coition In the nomenclature of emotion this trichotomy concerns the interdependencies between aggressiveness fear and sexual impulsion A considerable amount of research evidence is aggregated in support of these interdependencies The author ultimately examines the exploitation of the existing connections between sexual and aggressive behaviors especially the exploitation that serves the enhancement of sexual pleasure In this context he arrives at novel and perhaps distressing characterizations of sexual coercion However he also explores sexual boredom and discusses remedies in the framework of his theorizing Last but not least sexual aggression and sexual and aggressive behaviors independently are placed into an evolutionary context Recognition and acknowledgment of the archaic nature of many aspects of sexual and aggressive behaviors in contrast to the comparatively vernal development of behavior guiding contemplation leads him to a unique and provocative proposal of the function of aggression in the realm of sexuality

**Unmarking Whiteness and the New American Racism** Michael L. Blakey, 2025-07-18 This book criticizes recent performative solutions to racism diversity programs at universities for example and White people's fragility or intolerance of mature criticism These ideas are locked in an intellectually gated and defensive conversation that effectively denies the ongoing particular abuses of White supremacy This book instead proposes expensive educational and economic changes including reparations as necessary to achieve real equity Once imputed by the eugenical effects of World War II and the Civil Rights Movement's opposition to White racism the word race was largely stricken from scientific writing But biological determinism remained deeply ensconced in an institution of science that assumed the natural world to be determining making natural science its most authoritative means Authoritative heritability estimates and genetic correlations though spurious continued to imply that obvious racial and class inequalities including their dire health effects were natural and acceptable White people often attempted to unmark their racial identity and assumed that of the uniquely normal people as though an act of anti racism Frankenberg shows On the contrary it served to deny their skin color privileges while enjoying benefits of ongoing structural racism as the only real complete human beings in the room This book uses an ethnology of anthropology to show White people's equivocal views of other's equality in their formal analyses museum collections and exhibitions and treatment of colleagues in recent times They remained deliberately deaf to critical African diasporic scholarship Thus Unmarking gives an anthropological analysis of the social history of White supremacy and shows what it is

like for some to confront it In constructing this historical and sociological counternarrative the author provides a critical new social history that illuminates a tangled and turgid past for contemporary readers students and researchers with vital insights for anthropology sociology history cultural studies philosophy and American studies     **Alan Watts in Late-Twentieth-Century Discourse** Peter J. Columbus,2023-11-17 This book is an anthology of commentary and criticism written within the transitional period between Alan Watts 1973 death and the twenty first century intellectual horizon Comprised of 16 chapters written and published between 1974 and 1994 with up to date introductions from the essayists and other contemporary thinkers this volume opens a window onto unexplored grounds of Alan Watts impact within late twentieth century discourse an intermediate space where scholars reoriented their bearings through changing times and emerging academic trends Offering varied explanations and assessments of Alan Watts including his influence on the Beat and Hippie generations and his popularization of Zen Buddhism in America it tackles unaddressed questions within the milieu of late twentieth century America from the Reagan Revolution and religious conservatism to paradigm shifts in Buddhist studies and the rise of post colonial theory Contributors post mortem analyses and critiques of Watts allow for a thematic rendering of their consonance or dissonance with noted Beat Hippie and Zen Buddhism themes of his lifetime This volume will appeal to scholars and students of humanistic psychology transpersonal psychology the psychology of religion comparative religion and American studies     Harold D. Lasswell: An Annotated Bibliography Rodney Muth,Mary M. Finley,Marcia F. Muth,1990-07-31     **National Library of Medicine Current Catalog** National Library of Medicine (U.S.),1969 First multi year cumulation covers six years 1965 70     Rediscoveries and Reformulations Hayward R. Alker,1996-05-30 This book provides a distinctive and rich conception of methodology within international studies From a rereading of the works of leading Western thinkers about international studies Hayward Alker rediscovers a neo Classical conception of international relations which is both humanistic and scientific He draws on the work of classical authors such as Aristotle and Thucydides modern writers like Machiavelli Vico Marx Weber Deutsch and Bull and post modern writers like Havel Connolly and Toulmin The central challenge addressed is how to integrate positivist or falsificationist research styles within humanistic or interpretive ones The author argues that appropriate philosophically informed reformulations of conventional statistical and game theoretic analyses are possible and describes a number of humanistic methodologies for international relations including argumentation analysis narrative modeling computational models of political understanding and reconstructive analysis     *Diseases and Disorders in Contemporary Fiction* James Peacock,Tim Lustig,2013-04-17 The essays in this collection address the current preoccupation with neurological conditions and disorders in contemporary literature by British and American writers The book places these fictional treatments within a broader cultural and historical context exploring such topics as the two cultures debate the neurological turn postmodernism and the post postmodern and responses to September 11th Considering a variety of materials including mainstream literary fiction the graphic novel

popular fiction autobiographical writing film and television contributors consider the contemporary dimensions of the interface between the sciences and humanities developing the debate about the post postmodern as a new humanism or a return to realism and investigating questions of form and genre and of literary continuities and discontinuities Further the essays discuss contemporary writers attempts to engage the relation between the individual and the social looking at the relation between the syndrome syndrome referring to the prevalence in contemporary literature of neurological phenomena evident at the biological level and existing work in the field of trauma studies where explanations tend to have taken a psychoanalytical form allowing for perspectives that question some of the assumptions that have marked both these fields The current literary preoccupation with neurological conditions presents us with a new and distinctive form of trauma literature one concerned less with psychoanalysis than with the physical and evolutionary status of human beings The Materiality of Language David Bleich, 2021-12-22 A critique of male dominated modes of language use their roots in higher education their effects and their spill over into popular culture David Bleich sees the human body its affective life social life and political functions as belonging to the study of language In The Materiality of Language Bleich addresses the need to end centuries of limiting access to language and its many contexts of use To recognize language as material and treat it as such argues Bleich is to remove restrictions to language access due to historic patterns of academic censorship and unfair gender practices Language is understood as a key path in the formation of all social and political relations and becomes available for study by all speakers who may regulate it change it and make it flexible like other material things A potentially foundational text in an emergent field of language studies whose work is to break up the monopoly Linguistics and Philosophy have had on the study of language The insight that the affective operation of language is elided in nearly all approaches to language acquisition is brilliant and astounding The analysis of subject creation as an affective process of recognizing and sharing the same affective state and language as the means for materializing affective states is fascinating and persuasive One of the book s distinctive features is the use of gender as a key normative analytical lens throughout It would be difficult to exaggerate how rare this is among language thinkers and how productive it is for the arguments here Mary Louise Pratt New York University A powerful first rate book on a crucial topic It offers a great interpretation of the sacralization and ascendancy of Latin as a language supporting what Bleich calls an elite group of men This is a brilliant codebook to academic language and its coercions Dale Bauer University of Illinois b DESC literary theory semiotics literary criticism philosophy language philosophy philosophy of language gender studies social science language studies communication studies language arts language disciplines gender sex language rhetoric academic language colloquial language language political aspects language sex differences language and gender LIT006000 LITERARY CRITICISM Semiotics Theory PHI038000 PHILOSOPHY Language SOC032000 SOCIAL SCIENCE Gender Studies LAN004000 LANGUAGE ARTS DISCIPLINES Communication Studies 9780253016508 Well Tempered Woodwinds Friedrich von Huene and the Making of Early Music in a New World
